THE CAPTAIN'S CATCHER'S AWARD

AWARDED TO THE TOP MINOR LEAGUE CATCHER

PRESENTED BY:

ABOUT THE AWARD

All-Star Sporting Goods® and Baseball America® want to recognize today's hardest working minor league catchers for their abilities as a backstop.

Inspired by the catching skills and character of Jason Varitek, this watch is only about catching and who plays the position to the fullest both on and off the field.

This award's main focus is the player's defensive strengths, not just offensive abilities. The best catchers are detail-oriented and driven to improve their performance behind the plate. Leadership, dedication, the ability to call a game, blocking, receiving, making plays and the ultimate goal - protecting home - are the primary qualities the award seeks to recognize.

PAST RECIPIENTS:

2011: Travis d'Arnaud
2012: Tim Federowicz
2013: Austin Hedges
2014: **Blake Swihart**

Baseball America®

EQUIPMENT SIZING

Proper fit. It's a really simple concept but very hard to do right. Above all, proper fit is paramount for protective equipment. Without proper fit, risk of injury and discomfort greatly increase. With so many catchers of different shapes and sizes, it is a must that we develop gear which can be individually customized to ensure proper fit. Our gear works with the player, not against. With fit properly dialed in, a player can direct all focus to the game and *not* a chest protector which keeps dropping too low.

MVP HELMET AND TRADITIONAL MASK SIZING + FITTING:

For the most accurate sizing, it is recommended to use the player's hat size, found by measuring the circumference of the player's head, and then using the chart to the left to figure out recommended model / size.

CHEST PROTECTOR SIZING + FITTING:

All-Star® chest protectors are measured from the top of the sternum to a player's naval.

Depending on chest protector model, All-Star® chest protectors are available in 9, 13, 14.5, 15.5, and 16.5 inch lengths. If the player measures in between chest protector lengths it is recommended to select the longer length.

The chest protector should fit high, with the throat guard over the base of the neck.

Because the DeltaFlex™ harness is adjustable in 4 different locations you can dial in a fit that is perfect for you.

DELTA FLEX™

LEG GUARD SIZING + FITTING:

Best done while seated, measure from center of player's knee cap to the top of the players cleats.

Depending on leg guard model, All-Star® leg guards are available in 10.5, 11.5, 12.5, 13, 14.5, 15.5, and 16.5 inch lengths. If the player measures in between leg guard lengths it is recommended to select the longer length.

Remember, on our Pro Series and System Seven™ leg guards, please adjust both sides of the DeltaFlex™ harness for the best fit. DeltaFlex™ harness should cradle the back of the calf muscle, lining up centered down the back of the calf.

ABOUT VELA™ FASTPITCH

SOFTBALL IS A COMPLETELY DIFFERENT GAME THAN BASEBALL. BEING FASTER PACED AND QUICKER, PLAYERS HAVE LESS TIME TO REACT AND MAKE A PLAY.

ON TOP OF THE GAME BEING DIFFERENT, THE ATHLETES ARE DIFFERENT. WOMEN HAVE DIFFERENT BUILDS AND SHOULD NOT BE FORCED TO WEAR BASEBALL EQUIPMENT.

HAVING EQUIPMENT THAT IS DESIGNED TO NOT ONLY MOVE WITH A PLAYER... BUT TO ALSO PROTECT THEM IS AT THE UPMOST IMPORTANCE.

THE VELA™ EQUIPMENT BY ALL-STAR® IS DESIGNED TO BE LIGHTWEIGHT, MOBILE, AND PROTECTIVE ALLOWING ATHLETES THE ABILITY TO PLAY AS HARD AS THEY CAN.

SYSTEM SEVEN™ CATCHING HELMETS

The helmet features an I-BAR VISION™ steel cage, a high impact resistant ABS plastic shell with increased forehead thickness, a backplate designed to keep the snaps on, and a breathable machine washable 3D mesh padding liner.

The bars on the cage around the eye openings are flatter for increased range of view and to make the bars stronger. Instead of using a round steel wire, the I-BAR VISION™ cages utilize a flat bar which is comparable to an I-Beam used in building construction.

SBFG4010	YOUTH	FOR USE WITH 10 INCH + SOFTBALLS

MAX VIEW & FULL FACE PROTECTION

This mask features ultra-thin vertical and horizontal I-BAR VISION™ steel bars. The patented vertical bars are so thin that they virtually disappear and go out of focus, which provides a larger range of view.

Compared to other fielding masks on the market, the horizontal bar is much lower, which makes the field of view feel huge! This is perfect for pitchers who look through the lower part of the mask or for fielders tracking ground balls.

LIGHTWEIGHT & WASHABLE

The forehead and chin padding can be removed for washing. To wash, simply use soap and water. The harness can be machine washed with a mild amount of detergent and then left to air dry.

This mask will feel weightless. Weighs in at a mere 12 oz. Held on with the pony tail ready DeltaFlex™ harness and chin cup. It does not shift or move while running, but is easy to talk through.

Multiple patents pending.

COMPLETE COVERAGE

Orange dots signify ball impacts. All-Star® System Seven™ batting helmets provide the most coverage compared to today's popular batting helmets.

The shell drops lower in the back for protection and for a more secure fit. The BH3500, BH3000, & BH3010 helmets feel extremely stable when running, especially when using a faceguard.

SYSTEM SEVEN™ BATTING HELMETS

Designed for protection, strength, and comfort, the System Seven™ adult BH3000 and youth BH3010 one size fits all batting helmets are recommended for youth through college level play. This is the best fitting helmet on the market.

The shell is constructed with high impact resistant ABS plastic. Corrugations in shell increase the helmets strength and the large vent ports placed throughout the helmet are to keep players cool. Hardware is pre-mounted to the helmet making it instantly ready to attach a batting helmet face guard or batting helmet chin strap. Chin strap snap is removable.

THE VELA™ THREE FING3R™ SERIES ARE THE ONLY GLOVES THAT PROVIDE A SOFTBALL SPECIFIC POCKET & WEB.

BACKGROUND

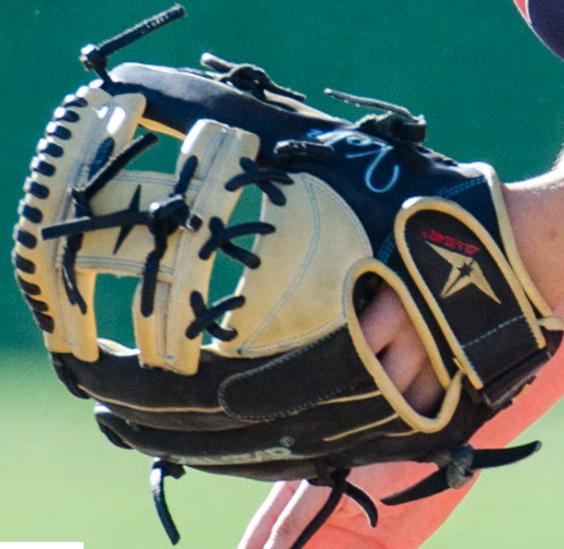

In softball and baseball, it's common for a player to position the hand inside a glove with two fingers in the glove's pinky. This is done for numerous reasons including making a deeper pocket, to make the glove feel 'longer', or to help avoid the index finger stinging from a caught ball. *This grip style on a conventional glove leaves the Index finger empty.*

THREE FINGERS, ONE HUGE POCKET

With so many players shifting their fingers over, leaving the index finger completely empty, All-Star® designed the Vela™ THREE FING3R™ fielding glove line around this concept... *and cut off the index finger!* This is arguably the most original and unique design to emerge on the softball scene. Why have 4 fingers when you can have three?

Because of the glove's design, players will not notice that there are only three fingers. What will be noticeable is the huge pocket, increased fielding area, and comfort.

**THREE
IS GREATER THAN
FOUR**

YOU ONLY HAVE ONE HEAD.

WHY CHOOSE AN ALL-STAR S7™ HELMET?

5 REASONS YOUR HEAD WILL BE THANKFUL:

1. FAST DRYING MACHINE WASHABLE PADDING

The 3D mesh protective liner system is the most comfortable on the market. Not only does it wick away moisture, but it is also fast drying and machine washable. The liners remove fast and can just as quickly be resecured.

2. SNAPS STAY SNAPPED

The three attachment points on the back plate of the catching mask are designed to never pop off.

Each strap runs underneath a "bridge" which secures the buckle to the helmet's back plate.

3. BUILT FOR IMPACTS - BUILT TO LAST

Extra material has been built into the design of the helmet in the high impact points, like the forehead.

This feature makes the helmet much more protective and durable so it can withstand more abuse.

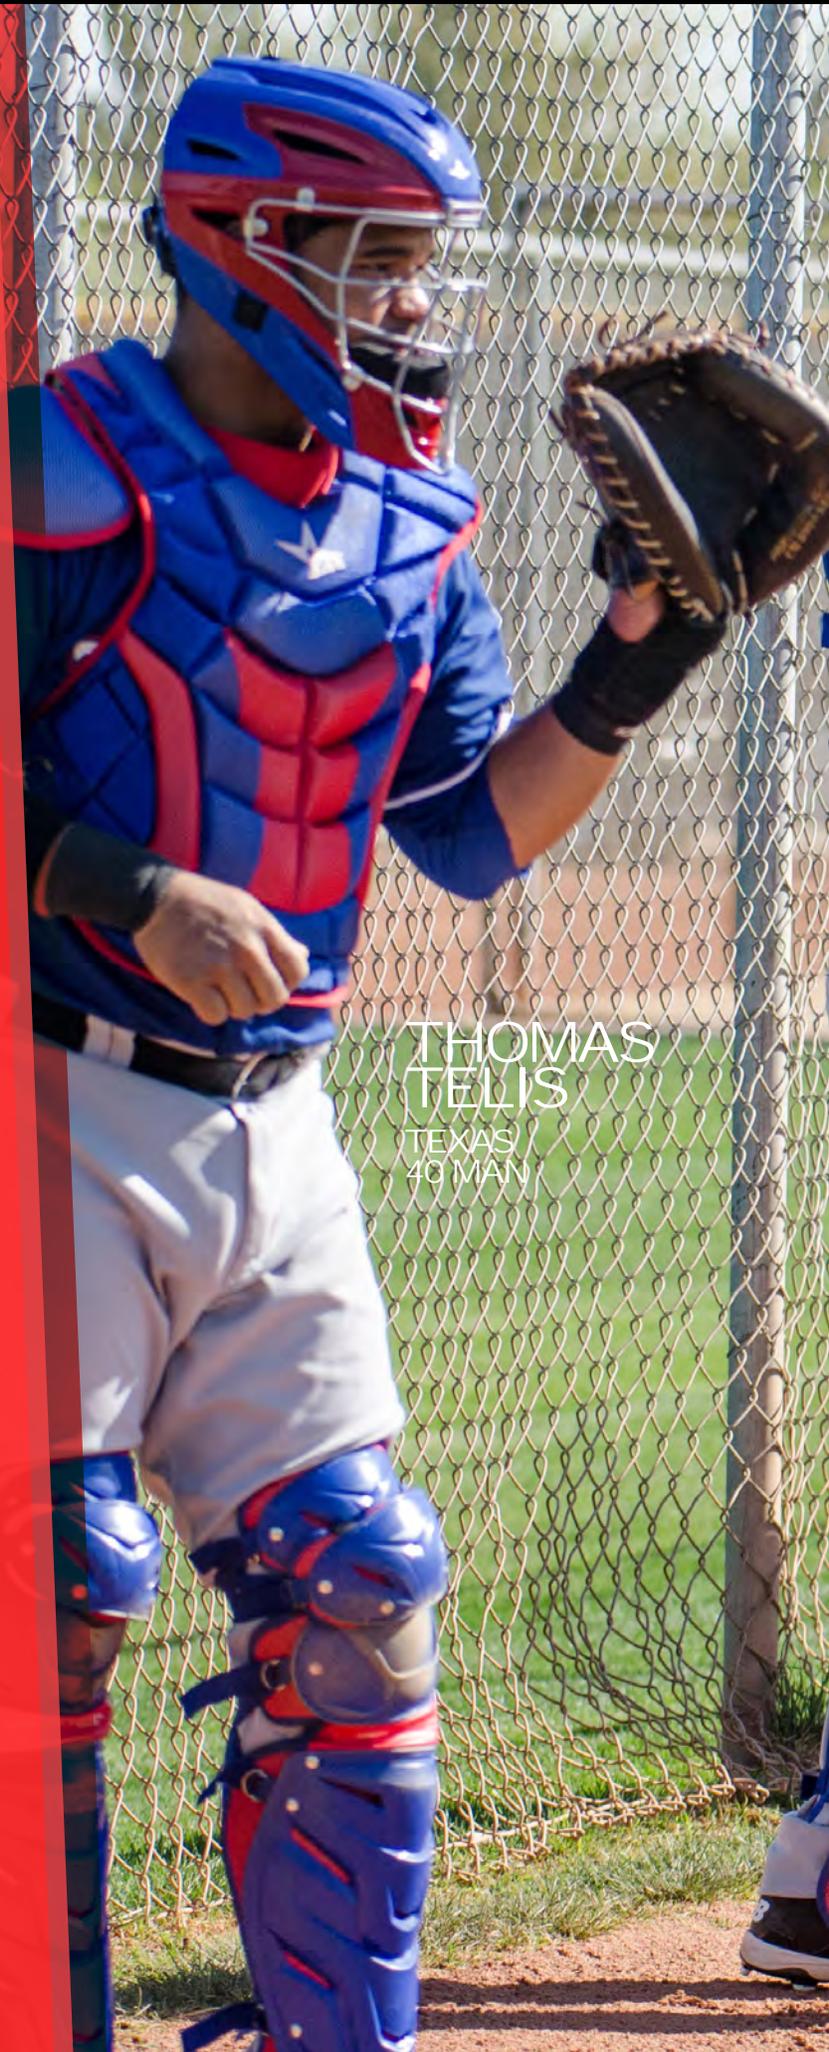

4. PERFECT BALANCE & PERFECT FIT

Compared to past All-Star® models and other helmets on the market, the System Seven™ series of catching helmets feels weightless when worn.

The helmet naturally rests on the center of a player's head which makes it feel lighter.

5. IMPACT DISPERSION CAGE

The cage is only attached by the temples and by the chin. Looking at the cage closely, you can notice that there is an air gap along the top edge of the forehead so that when a ball impacts the cage, the force has to travel through the cage before going into the rest of the helmet and your head.

The bars on the cage around the eye openings are flatter for increased range of view and to make the bars stronger. Instead of using a round steel wire, the I-BAR VISION™ cages utilize a flat bar which is comparable to an I-Beam used in building construction.

CATALYST™

ICE YOUR HEAD.COM

YOU ICE EVERY OTHER PART OF YOUR BODY AFTER AN INJURY... WHY NOT YOUR HEAD?

Studies show that every hit to the head counts, whether big or small. This is especially true in sports where there are repeated hits during practices and games.

Evidence* indicates that cooling the brain reduces inflammatory effects that occur from head trauma. So ice your head, and ice it often after practices and games with the only product on the market designed specifically to do this: The Catalyst CryoHelmet™.

WHAT WE KNOW:

Right now there is no great treatment for severe or mild traumatic brain injuries such as concussions. Rest is the only recommended course of action.

Ice is used to treat all other body parts for recovery after practices/games and to treat injuries.

Evidence* indicates that cooling the brain reduces inflammatory effects that occur from head trauma.

Cold treatments* (therapeutic hypothermia) have shown to help the brain in rat and human studies.

Injuries (contusions/swelling) to the face, ears and skull are often iced.

Migraine and headache sufferers have been using ice on their heads for decades.

Hospitals are using expensive devices to cool patients' heads for heart attacks, stroke, and severe traumatic brain injury.

Every hit matters. Big or small. During practice and games. This trauma adds up over time.

SUGGESTED USE / FEATURES:

- Use for 30 - 40 minutes following any practice or game
- Reusable. Recharge in household freezer overnight
- Insulating neoprene shell (contains no natural rubber - latex free)
- CryoMax® patented technology stays colder longer than regular ice or gel packs
- CryoMax® strips are repositionable inside neoprene shell for custom fit
- All fabric and neoprene surfaces are treated with the Aegis Microbe Shield® (Kills MRSA 99.999%)
- Elastic strap for adjustable fit and better heat transfer
- All parts are machine washable, line dry
- Domestic and international patents pending
- Use of the CryoHelmet™ is not a substitute for seeking proper medical attention

BH3500 SIZED BATTING HELMETS

Being a sized helmet, the System Seven™ BH3500 is great for players looking for a personalized fit. These batting helmets are recommended for intermediate travel teams through college level play.

The shell is constructed with high impact resistant ABS plastic. Corrugations in shell increase the helmet's strength and the large vent ports placed throughout the helmet are to keep players cool. Just like the BH3000, hardware is pre-mounted to the helmet for attaching a batting helmet face guard and batting helmet chin strap. Chin strap snap is removable.

COMPLETE COVERAGE

Orange dots signify ball impacts. All-Star® System Seven™ batting helmets provide the most coverage compared to today's popular batting helmets.

The shell drops lower in the back for protection and for a more secure fit. The BH3500, BH3000, & BH3010 helmets feel extremely stable when running, especially when using a faceguard.
