WOOD BATS

## WHY BIRCH?

**BEST OF BOTH WORLDS.** Combines the closed-grain stiffness and hardness of Maple and the lighter weight and turning model variety of Ash. Birch is the fastest growing species among elite hitters.

## WHY MAPLE?

**DENSE TIMBER FOR A HARDER HITTING SURFACE.** Closed-grain wood is less prone to flake like Ash and allows for more durability. Maple is now the #1 species among elite hitters.

## WHY ASH?

**STRONG TIMBER, LIGHTER WEIGHT.** Pound for pound, Ash is the strongest timber available. Ash tends to flex, giving the hitter a more flexible sweet spot. Ash is available in the widest range of turning models.

## TRACK. ANALYZE. COMPARE. IMPROVE.

Measure the most important aspects of your swing, then analyze and improve each one. Zepp offers an incredible set of 3D and video analysis features that give you instant feedback. You can even compare your swing to the pros.

### 3D SWING

See what really happens during your swing and compare your technique to the best.

### BAT SPEED

Learn how to get more bat lag in your swing and max your bat speed at impact.

### HAND SPEED

Increase your chances of success by developing lightning quick hands to get your bat in the hitting zone sooner.

### TIME TO IMPACT

Build a short and compact swing that allows you to see the ball longer and swing at better pitches.

### ATTACK ANGLE

Get your bat on a path for success to hit line drives more consistently.

### VERTICAL ANGLE

Learn how to control your bat and stay inside the ball when you swing.

## SETTING UP IS EASY.

Zepp may be high-tech, but setting it up is simple. You'll be swinging your bat and viewing your results in a matter of minutes. Here's all you need to do to get started.

Attach the mount to your bat and insert the sensor.

Connect wirelessly via Bluetooth to see your swing data.

Analyze your swing on your mobile device.

## WE'RE HERE TO HELP YOU GET THE MOST OUT OF ZEPP.

Learn from the pros with our exclusive video content and training center. Watch detailed swing analysis videos, training tips, and access drills designed by the best coaches in baseball. Set goals and practice with purpose using instant swing data to track your improvement over time.

ADVANCED DESIGN

SCARLET – SR

A.I.C. COMPOSITE MATERIAL

### HOW DOES IT WORK?

A.I.C. (Advanced Impact Composite), an impact-absorbing, intelligent material, is strategically positioned over impact prone areas of the hand and wrist – all without sacrificing fit, comfort or flexibility. Impact energy is absorbed and dispersed through the A.I.C.

### THE PROOF

The impact load generated by a 100 MPH ball is reduced to the equivalent of a 40 MPH ball. BE PROACTIVE, BE AGGRESSIVE.

### THE FUTURE OF BATTING GLOVE TECHNOLOGY

This unique design is lighter, cooler, and less restrictive, giving players unshakable confidence at the plate. Louisville Slugger believes confidence is the most valuable tool you bring to your game.
