

OAKLEY EYEWEAR

**OAKLEY FOOTBALL SHIELDS**

## OAKLEY FOOTBALL SHIELD

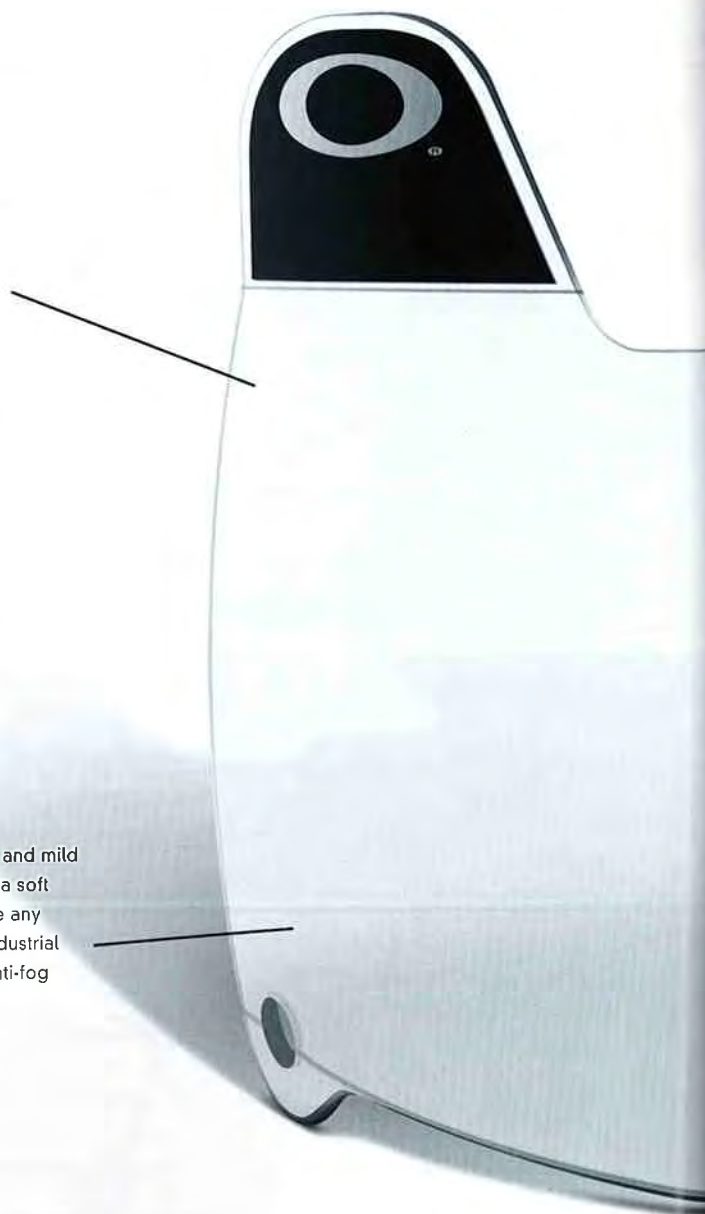

The only eyeshield that meets and exceeds the demanding ANSI Z87.1 standard for optical clarity. Provides distortion-free optics through the entire range of vision. Providing a nearly impenetrable barrier for your eyes against on-coming objects. Oakley Eyeshield surpasses the ANSI Z87.1 standard for impact resistance and provides shatter-proof protection. Every Oakley Visor is coated with AFR, a specially formulated coating that provides anti-fog and scratch resistant properties to the polycarbonate visor, which ensures unsurpassed clarity and durability in any temperature condition.

### HIGH DEFINITION OPTICS\*

Oakley's patented XYZ High Definition Optics\* (HDO\*) maintains visual clarity at all angles of view, even at the edge of raked-back lens contours that maximize peripheral vision and protection. Conventional eyewear bends light rays and distorts vision at the lens periphery, but XYZ High Definition Optics\* (HDO\*) maps the full lens contour to the human eye, ensuring razor-sharp vision at all angles.

### SHIELD CARE

Shield should only be cleaned with warm water and mild soap prior to each use. Dry the eye shield with a soft cotton cloth or an Oakley Microbag. Do not use any solvent, abrasive, chemical, or commercial or industrial cleaner on any part of the shield. Do not use anti-fog products from other manufacturers, as they may adversely affect the Oakley anti-fog coating.

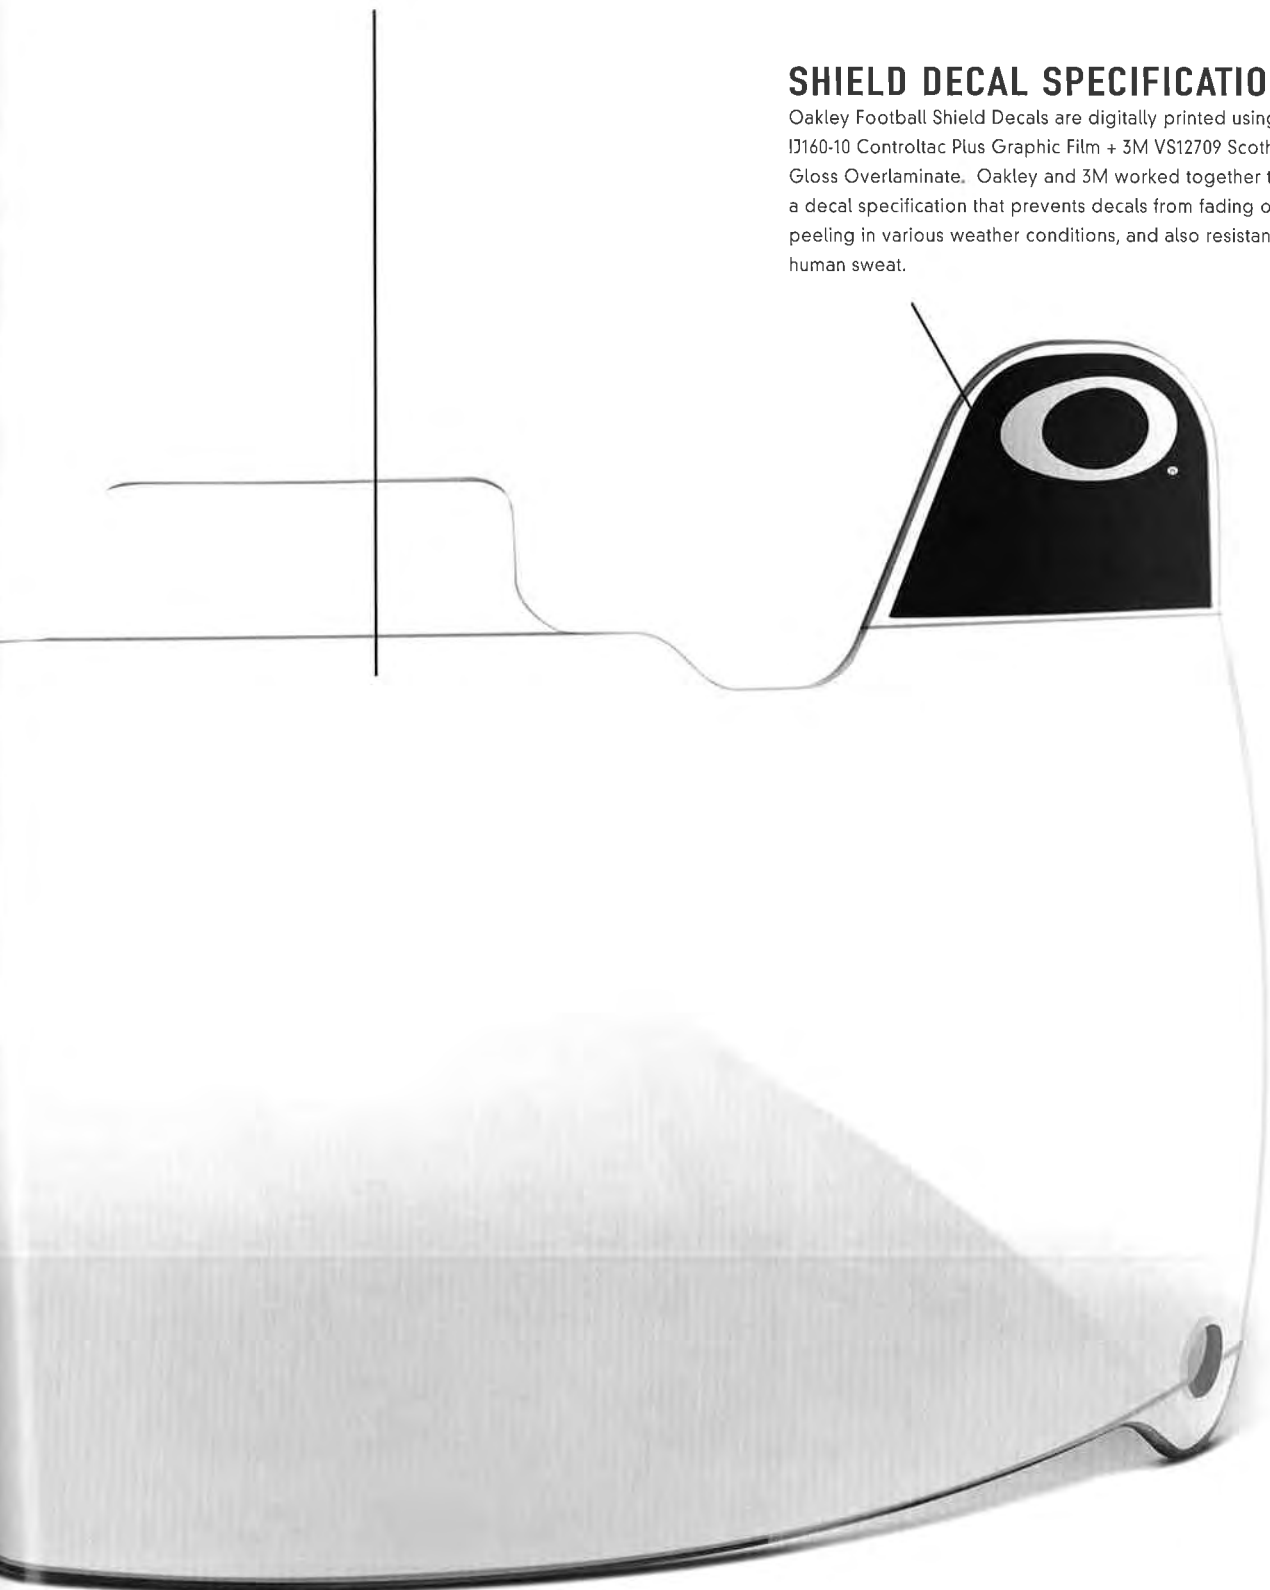

## PLUTONITE® LENS MATERIAL

All Oakley Shields are injection molded from impact-resistant Plutonite®, an optically superior material that inherently blocks 100% of all UV light and harmful blue light.

## SHIELD DECAL SPECIFICATIONS

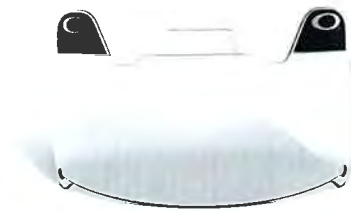

Oakley Football Shield Decals are digitally printed using 3M IJ160-10 Controltac Plus Graphic Film + 3M VS12709 Scotchcal High Gloss Overlamine. Oakley and 3M worked together to create a decal specification that prevents decals from fading or peeling in various weather conditions, and also resistant to human sweat.

## OAKLEY FOOTBALL SHIELDS

Dodging 240 lb. linebackers while running a sub-4.4 40 demands the best in optical clarity. Oakley football shields with HIGH DEFINITION OPTICS® (HDO®) technology. From high school to the pros, Oakley is the football shield brand of choice.
