

# ***Schutt***

***RELENTLESS DEDICATION TO THE PLAYER***

***2017 FOOTBALL CATALOG***

# **THE SCIENCE OF DOMINATION**

We build gear for performance. We build gear for protection. We build gear for players. But protection doesn't happen by accident. It takes decades of constant technological advancement and innovation - on every product we make. Innovation takes people on the factory floor committed to doing it the right way. It takes people in the lab committed to pushing the limits of engineering. It takes an entire company built around protection and committed to the Science of Domination. **Domination** comes from hard work. **Domination** comes from desire. **Domination** requires guts.

Schutt Sports: Driven by a relentless dedication to the player.

***schutt***

Nearly  
**40%**

of NFL players  
wear Schutt helmets.

# THEY HAVE CHOICE

What the players in  
the NFL are trusting  
their careers to.

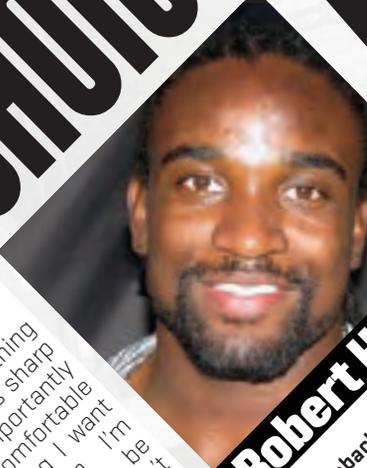

Over  
**55%**

Market Share growth in the NFL  
since 2011.

**Sammy Watkins**  
Pro Wide Receiver  
Buffalo

The Schutt Air XP is everything I look for in a helmet. It's sharp looking but more importantly it fits well and is comfortable to wear. The last thing I want to worry about when I'm playing is my helmet to be loose and ill-fitting. I don't ever plan to take the field without wearing the Air XP.

**Robert Hughes**  
Pro Linebacker  
Indianapolis, Arizona

I've always worn the Air XP because it gives me peace of mind. It's the best helmet of all the brands available and, thankfully, I've been able to stay injury-free. I think a big part of that is the confidence I feel wearing the XP.

Over  
**50%**

of NFL Skill Position Players  
wear Schutt helmets.

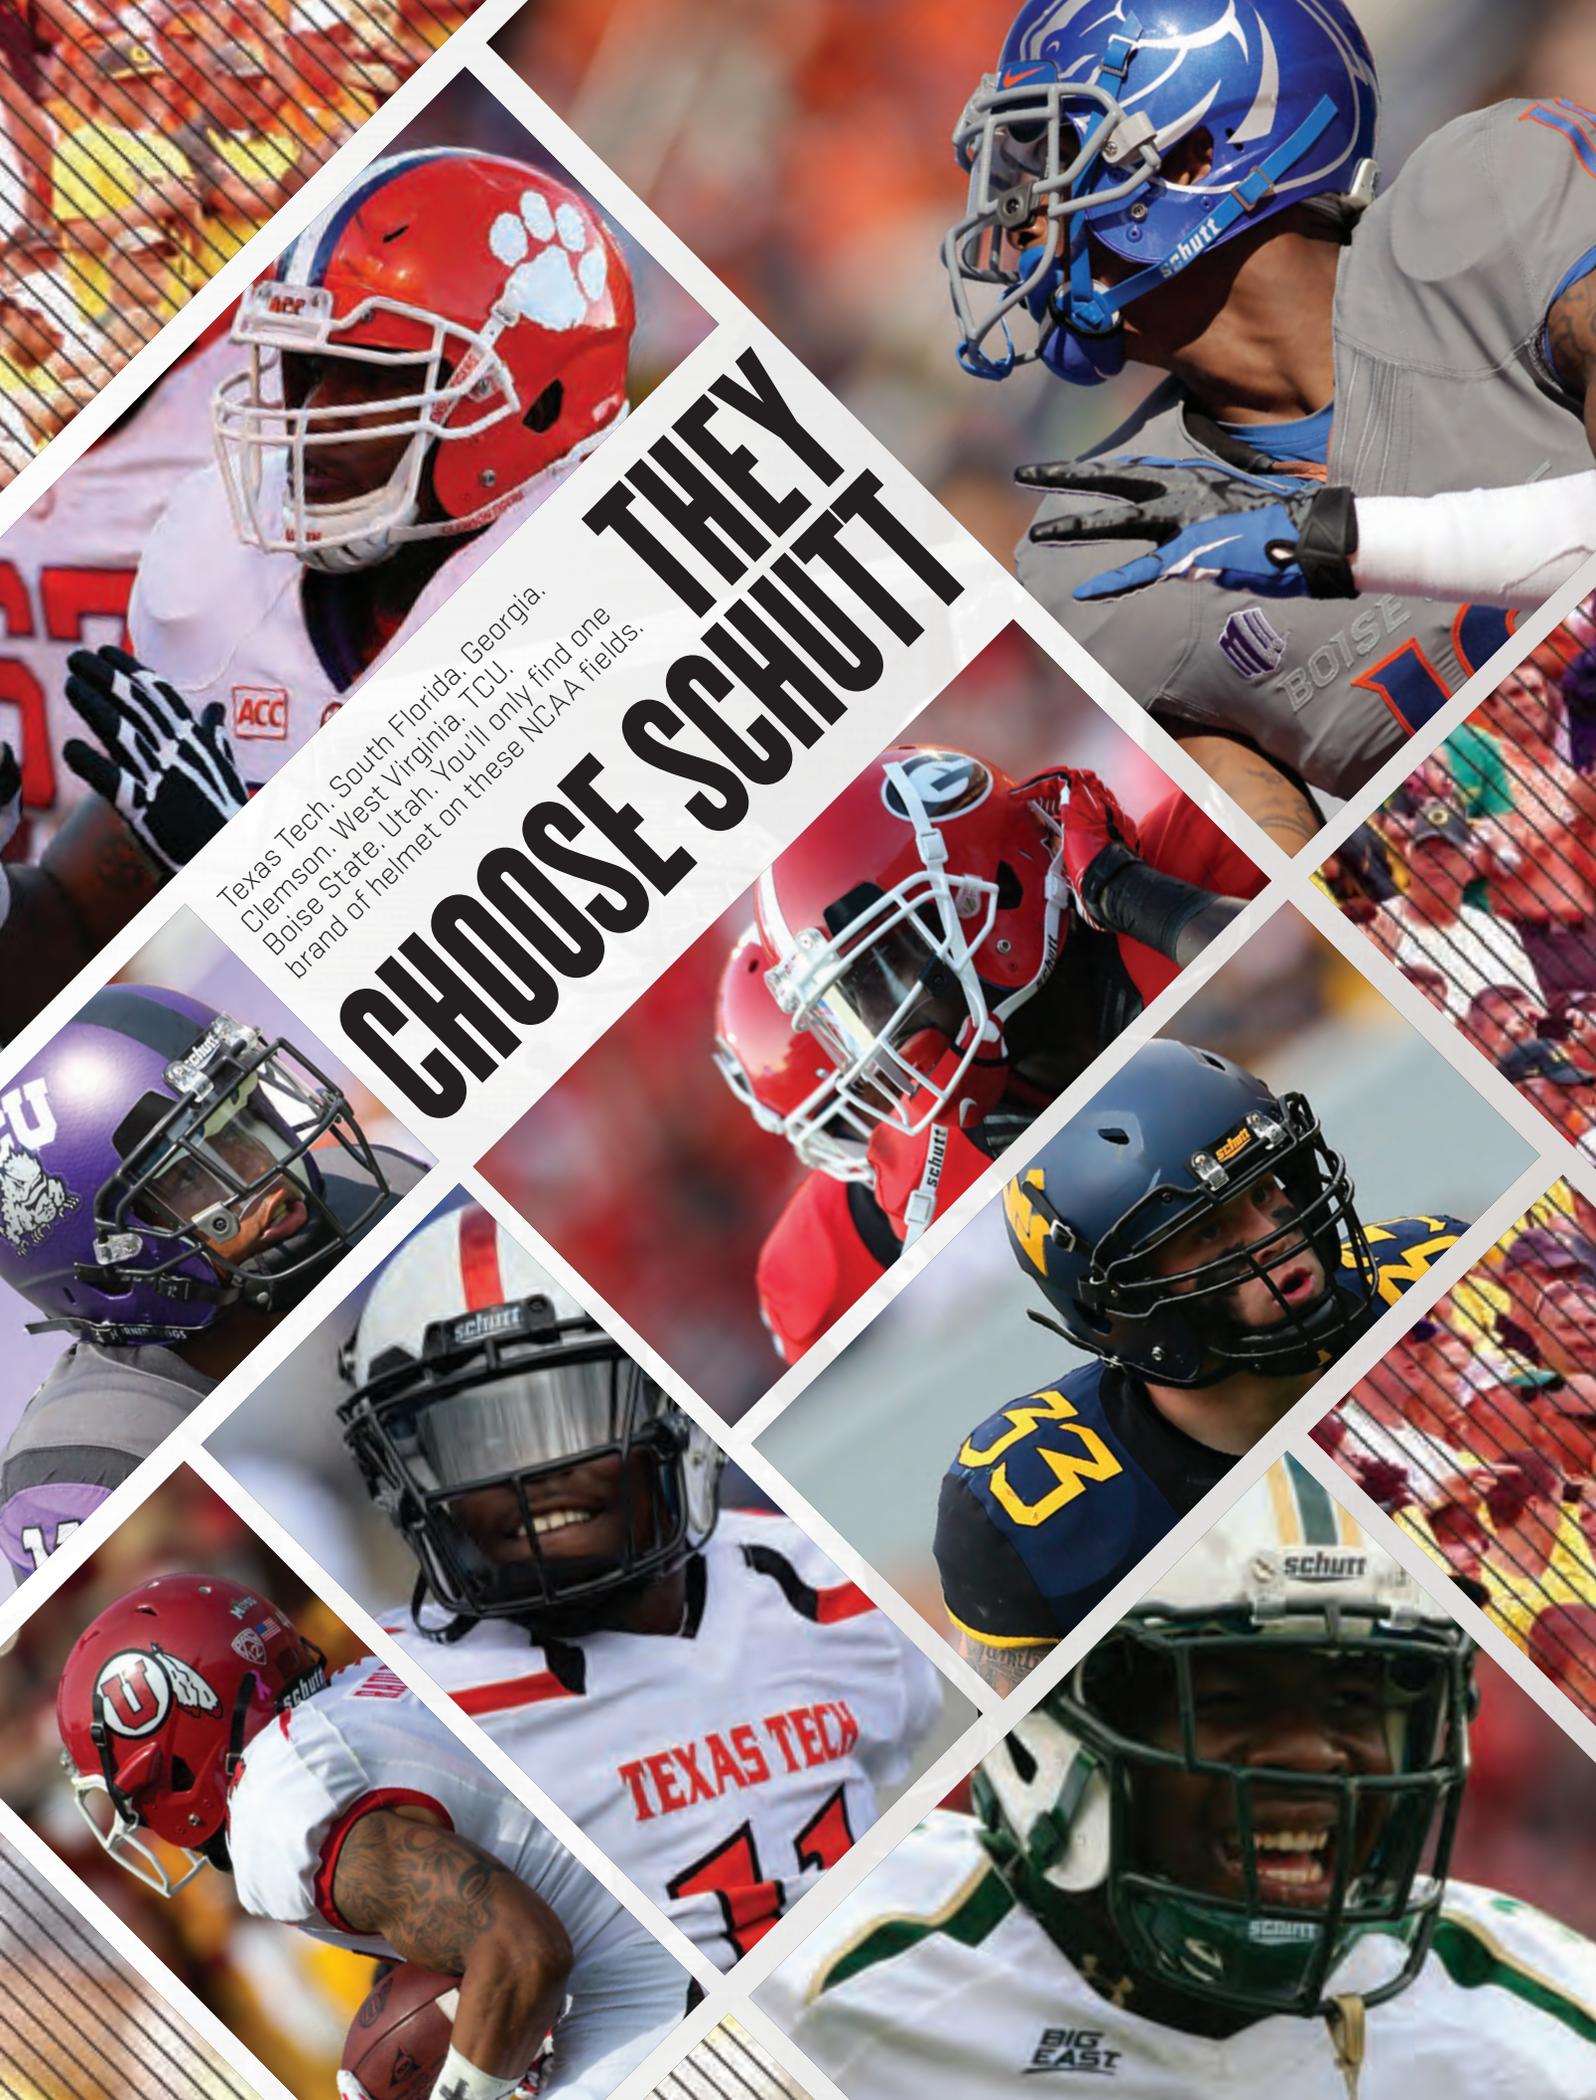

**Usama Young**  
Pro Defensive Back  
New Orleans, Cleveland, Oakland

There is no better looking helmet available than the Air XP. When you factor in how the Air XP fits and the way it's graded out from a safety standpoint, there's no doubt in my mind it's the best helmet.

Texas Tech. South Florida. Georgia.  
Clemson. West Virginia. TCU.  
Boise State. Utah. You'll only find one  
brand of helmet on these NCAA fields.

# CHOOSE SCHUTT

# #5-Star Domination

## More 5-Star Helmets Than Anyone Else

Schutt football helmets are the dominant technological force in the industry today. TPU Cushioning is the industry's best impact-absorption system and our engineers and designers have created the best-testing lineup of helmets on the field today. Schutt helmets are ranked the #1 and #2 5-star helmets (Best Available) in the Virginia Tech STAR rating system.\* On top of that, five of the top six and six of the top ten 5-star helmets are from Schutt. That's right. Six of the top ten helmets in the STAR rating system are Schutt helmets.\* The only other helmet maker with more than one (Rawlings) is no longer in the helmet business. Here's how our helmets ranked in the STAR rating system.\*

No other helmet maker uses technological advancement and innovation to dominate the STAR rating system the way we do. No one even comes close.

\* - all references to the STAR rating system, as well as specific scores or rankings, in this catalog refer to the scores and ratings as published by Virginia Tech on August 13th, 2016. These scores and ratings could have changed after this catalog was published

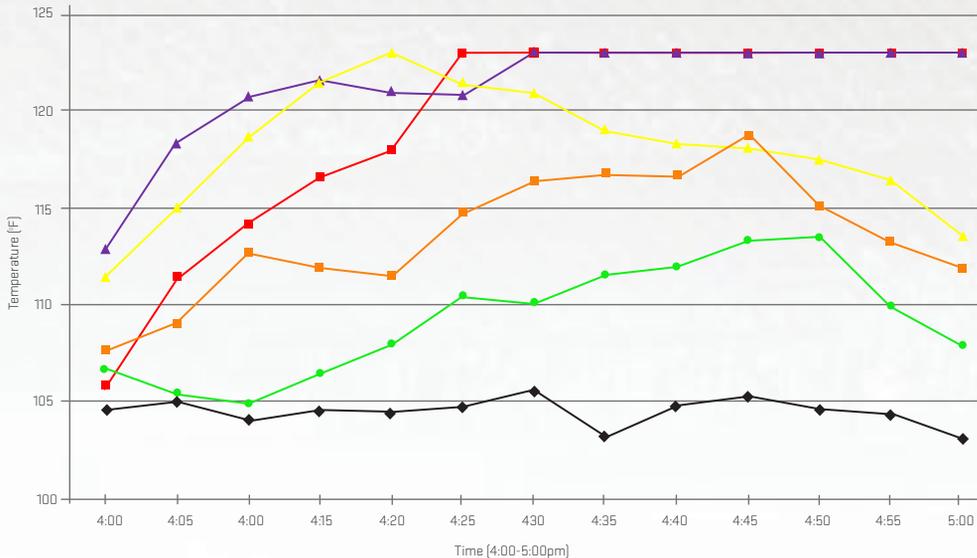

We design our helmets to perform well over a wide range of temperatures. To research the temperatures experienced inside helmet padding, Hotheads Technology, Inc. of Dallas, Texas gathered temperature data by installing sensors inside the pad systems of multiple football helmets and recorded the real-time temperatures of the pads during on-field play.

The graph below contains football helmet temperature data gathered at an NCAA BCS college practice in Texas during August. The graph clearly shows that temperatures of multiple pads significantly exceeded ambient temperatures and, in some cases, reached as high or higher than 123°F (the maximum reading that the sensors would provide). Additional helmets experienced similar temperature trends to those shown on the graph, but the graph is simplified for presentation purposes.

### HELMET PAD TEMPERATURES

Recorded at an NCAA BCS College Practice in Texas - August 25, 2011

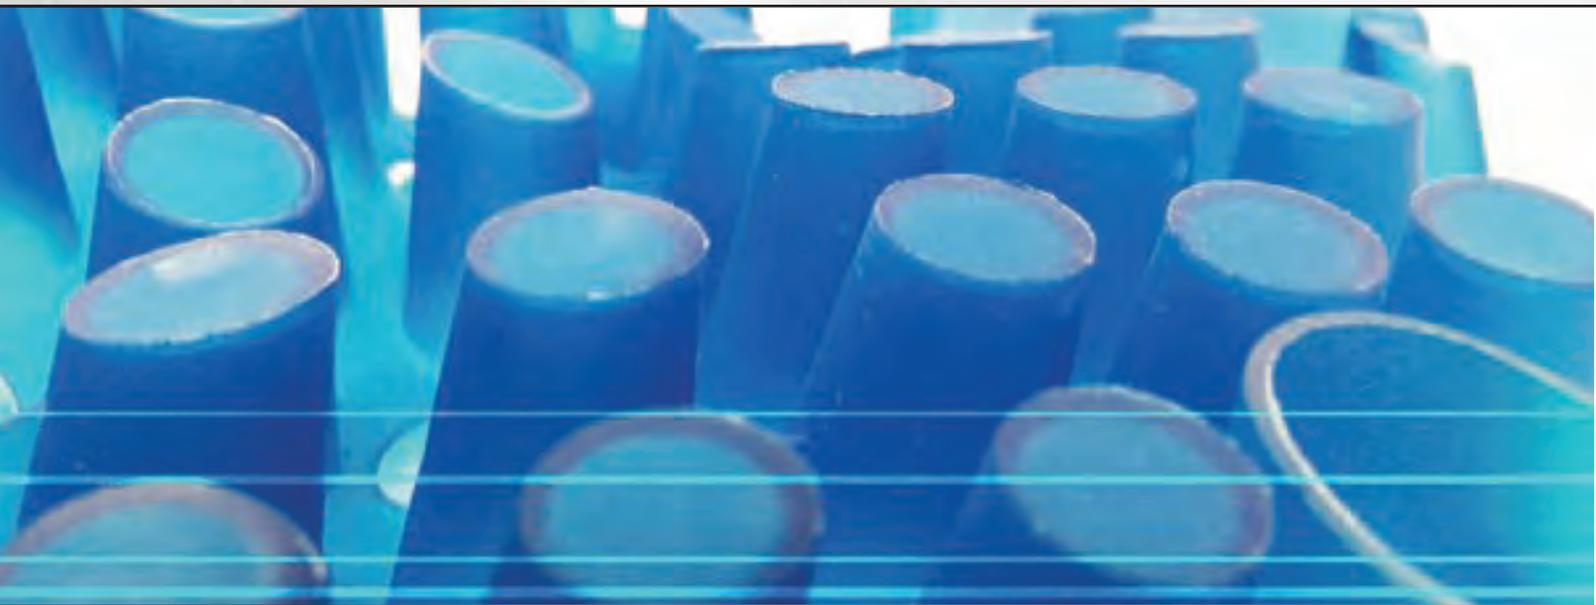

- Ambient Temperature ◆
- Helmet 2 Front Pad ▲
- Helmet 1 Front Pad ■
- Helmet 3 Crown Pad □
- Helmet 2 Crown Pad ▲
- Helmet 3 Right Pad ●

\*Data gathered by third party: Hot Heads Technologies, Inc. Temperature sensors recorded actual temperatures, but could only sense a maximum temperature of 123 (°F), as reflected above. Temperature sensors were embedded inside the padding of multiple helmets. All helmets shown in the above graph were black. Additional black and white helmets were tested, but were left out of the graph for clarity. The sensors in the white helmets recorded temperatures that ranged approximately from ambient to 110 (°F). All data from this study was provided to NOCSAE.

NO HELMET IS CONCUSSION PROOF. The information shown above is not an indication of the ability of the helmets to reduce or prevent concussions. There are too many variables that cause concussions for a football helmet to address them all. Helmets can manage force and impact by attenuating it. The above data at different temperatures provides some insight into the helmets' ability to absorb and attenuate impact at different temperatures. As temperatures inside the helmet vary over a wide range, the performance of Schutt TPU Cushioning remains more consistent when compared to the performance of foam padding and other cushioning systems, as demonstrated above.

## ***The Science of TPU Protection***

There is no doubt that TPU Cushioning is the most advanced impact absorption system on the football field today. Three years of independent laboratory research have proven that helmets with TPU Cushioning absorb more impact across a wider variety of temperatures than other helmet on the field. TPU Cushioning is at the heart of our relentless dedication to the player.

The evolution of TPU Cushioning is an ongoing challenge at Schutt. Our engineers relentlessly adapt and refine TPU Cushioning, re-designing and re-configuring it, it becomes better each generation. Dual-layer. Single-layer. VTD. TPU Cushioning is a versatile and customizable powerhouse. Plus, it's better at heat management and it doesn't take a compression set. Nothing dominates the way TPU Cushioning does.

## ***D30 Protection***

The Energy Lock Technology found in our youth helmets is powered by the patented protection and performance of D30<sup>®</sup> impact protection. D30<sup>®</sup> is a SMART material. It's rate sensitive, so it understands the different load rates of stress vs strain characteristics. In plain speak, this means the harder the impact to the D30<sup>®</sup>, the greater the resistance to the force. The technology in D30<sup>®</sup> does not "go hard" when it absorbs and disperses energy. The molecules lock together and then return to their original, flexible state.

D30<sup>®</sup> impact protection is a patented technology used to create a soft and flexible shock absorbing material that is ideal for use in youth football helmets:

- Patented Technology
- High Performance Shock Absorption
- Trusted Protection
- Maximum Flexibility
- Extremely Comfortable
- Tested to the Highest Standards

# #SCIENCEOFDOMINATION

**TPU  
CUSHIONING**

The most advanced impact absorption system in the game. Absorbs more impact more consistently across a wider range of temperatures than traditional foam padding systems whose performance deteriorates in temperature extremes. TPU Cushioning gives you better impact absorption, heat management and hygienics.

**SINGLE LAYER  
TPU**

Single Layer Dual Compression TPU is a ribbed system, constructed in only one layer, that delivers better impact absorption while reducing overall weight. Single Layer Dual Compression TPU absorbs both high velocity, violent impacts, as well as the low velocity impacts that occur on nearly every play.

**VTD TPU  
CUSHIONING**

VTD stands for Variable Thickness Durometer. The TPU Cushioning contains durometers that are specifically designed to absorb both high and low velocity impacts. Same great heat management and hygienics as our single layer TPU.

**TPU / D30®  
HYBRID CUSHION**

A powerful combination of TPU Cushioning and patented D30® technology means you get the advanced technology of TPU in the front and crown - and the protection of D30® in the sides and back - all in the same helmet.

**SUREFIT  
AIRLINER**

The SUREFIT Air Liner features a TPU outer skin with increased surface coverage that gives the helmet a soft, "pillow-like" feel. Additional comfort foam creates a dynamic fit and long-lasting durability. Features an additional layer of high impact foam in the front cushion to give a better fit.

**NON-INFLATABLE  
HELMET LINER**

Features additional surface coverage and additional comfort foam placed inside the liner. This adds supreme durability and a "soft, pillow-like" feeling to the helmet.

**EVA FOAM  
PADDING**

A sized liner system combining comfort of EVA foam and breathability of air channels. Sized liner parts are interchangeable to fit many head shapes.

**EPP FOAM  
LINER**

Expanded Polypropylene is a lightweight engineered plastic foam providing excellent impact absorption. Our unique formulation is durable and handles the most rigorous demands of the game.

**INTER-LINK  
JAWPADS**

The Inter-Link Jaw Pad has the ultimate security of mechanical attachment to the shell while providing quick, customizable sizing for every player on the field. Once attached to the shell, there are no tools needed to change out jaw pad covers for proper fitting.

**AIR MAXX  
TPU JAW PADS**

Our AiR MAXX TPU Jaw Pads bring together the impact absorption power of TPU and the soft fit of our liner systems to provide you with superior protection and comfort.

**HELMET STABILIZATION  
SYSTEM**

The Helmet Stabilization System frames your face and gives you a secure, "locked in" feel inside the helmet. Air flow inside the helmet is enhanced with the open sided TPU Cushions.

**STABILIZER  
JAW PADS**

Specially designed jawpads are used in concert with the Helmet Stabilization System to offer superior performance with a customized fit that you won't find anywhere else.

At the heart of #ScienceOfDomination is the vast array of technology and innovation we engineer into each of our helmets. From the all-new Helmet Stabilization System to the SUREFIT air liners to titanium faceguards. And of course, TPU Cushioning – football’s most advanced impact-absorption system.

**POLYCARBONATE SHELL**

Helmets made from PCA are made from a strong and durable polycarbonate alloy, built to withstand the harder hitting that comes with bigger and older players at more advanced levels of football. Used in all Schutt varsity helmets.

**ABS PLASTIC SHELL**

Lighter than those made with polycarbonate. ABS helmets are ideal for smaller players taking less powerful hits. This also helps keep young players from dropping their heads late in the game. Used in all Schutt youth helmets.

**COMPACT VENGEANCE SHELL**

The bold, high-powered Vengeance helmet shell has been reimagined and re-designed to offer a sleek, lightweight lower profile.

**LARGE STANDOFF**

A helmet’s standoff is the space between the player’s head and the helmet shell. Large standoff helmets allow us to insert thicker TPU cushioning, which means greater impact absorption and performance.

**TRADITIONAL STANDOFF**

The traditional standoff has a smaller space between the player’s head and the shell. The TPU cushioning in our traditional standoff helmets means they absorb more impact than most other large standoff helmets on the market.

**VENGEANCE FACEGUARD**

Organically inspired and intimidating by design, these faceguards feature a raised eyebrow design that increases impact dispersion.

**Z10 / Q10 FACEGUARD**

The Vengeance Z10 and AiR XP Pro Q10 are equipped with special titanium faceguards designed to offer maximum coverage and reduced weight.

**MECHANICALLY ATTACHED TPU**

Not only does this process hold the TPU securely in place, it also allows us to put thicker TPU Cushions in the helmet, increasing impact absorption.

**TWIST RELEASE RETAINER**

This two piece faceguard retainer system eliminates upper loop straps, making it easier and faster to attach or remove the faceguard.

**STANDARD NOSE BUMPER**

The Standard Nose bumper guards the bridge of the nose from the helmet shell.

**QUARTER TURN RELEASE**

Significantly reduces the amount of time required for faceguard attachment or removal, giving quick and easy access to the player.

**VALVE ATTACHMENT SYSTEM**

Our helmets with inflatable air liners feature a secure attachment system that holds the inflation ports securely in place. No more fishing around when you’re trying to inflate the liner or trying to line up the ports with the ventilation holes.

## *The #ScienceOfDomination Starts With the Helmet*

You already know Schutt helmets are the best testing helmets on the field and absorb more impact than any other helmets. But we also know that domination isn't just about how you perform. It's about the image you create for your opponents, the intimidation factor - the ability to get inside your opponent's head. That's why our helmets have an extra helping of bad-ass baked into every one.

**NEW FOR 2017**

# VENGEANCE Z10

MSRP: \$450.00

Schutt Sports is driven by the relentless dedication to the player. We build gear for performance. We build gear for protection. We build gear for players. Maybe that's why we have more 5-Star Rated Helmets than anyone else. Or why over 50% of NFL Skill Position players wear Schutt helmets. Or why we've had the highest ranked helmet in NFL Helmet Testing since 2010.

The Z10 is one of two new Vengeance helmets taking football by storm. Over 150 players in the NFL have switched to the Vengeance Z10 or PRO since they were introduced in January 2016. The Z10 features a new, lower-profile helmet shell that's unbelievably lightweight, along with the all-new Helmet Stabilization System, Titanium Z10 Faceguard, and SC4 Hard Cup Chin Strap. It also features a newly re-engineered front pad and interchangeable crown liners, as well as a TPU-enhanced SUREFIT air liner.

## *Vengeance Z10 for Performance.*

The bold, high-powered Vengeance helmet shell in a sleek, lightweight lower profile. With its Z10 titanium faceguard, the Z10 weighs in at just over 3 pounds! The Z10 is rated a 5-star (Best Available) in the Virginia Tech STAR helmet rating system.

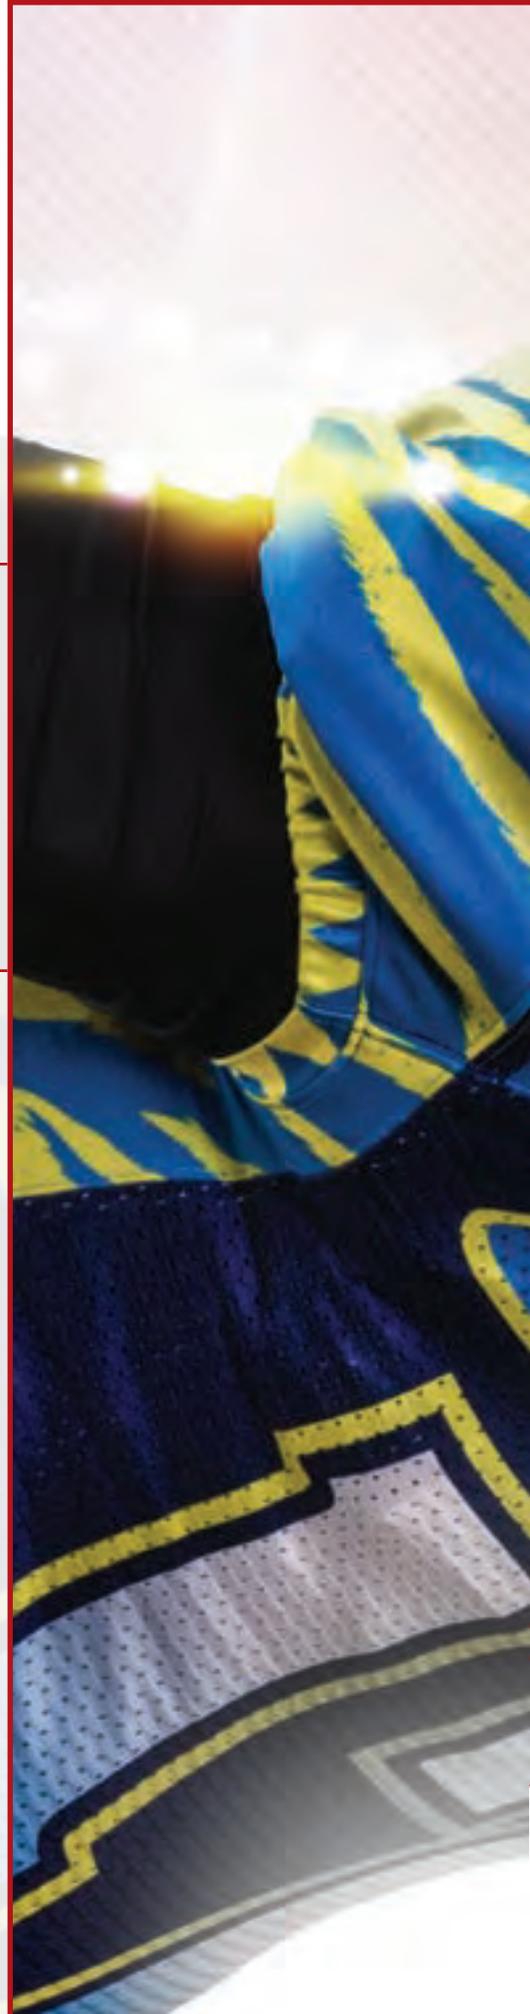

## *Vengeance Z10 for Protection.*

TPU Cushioning is featured inside the helmet. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. The Z10 features the all-new Helmet Stabilization System, which enhances performance through better fit.

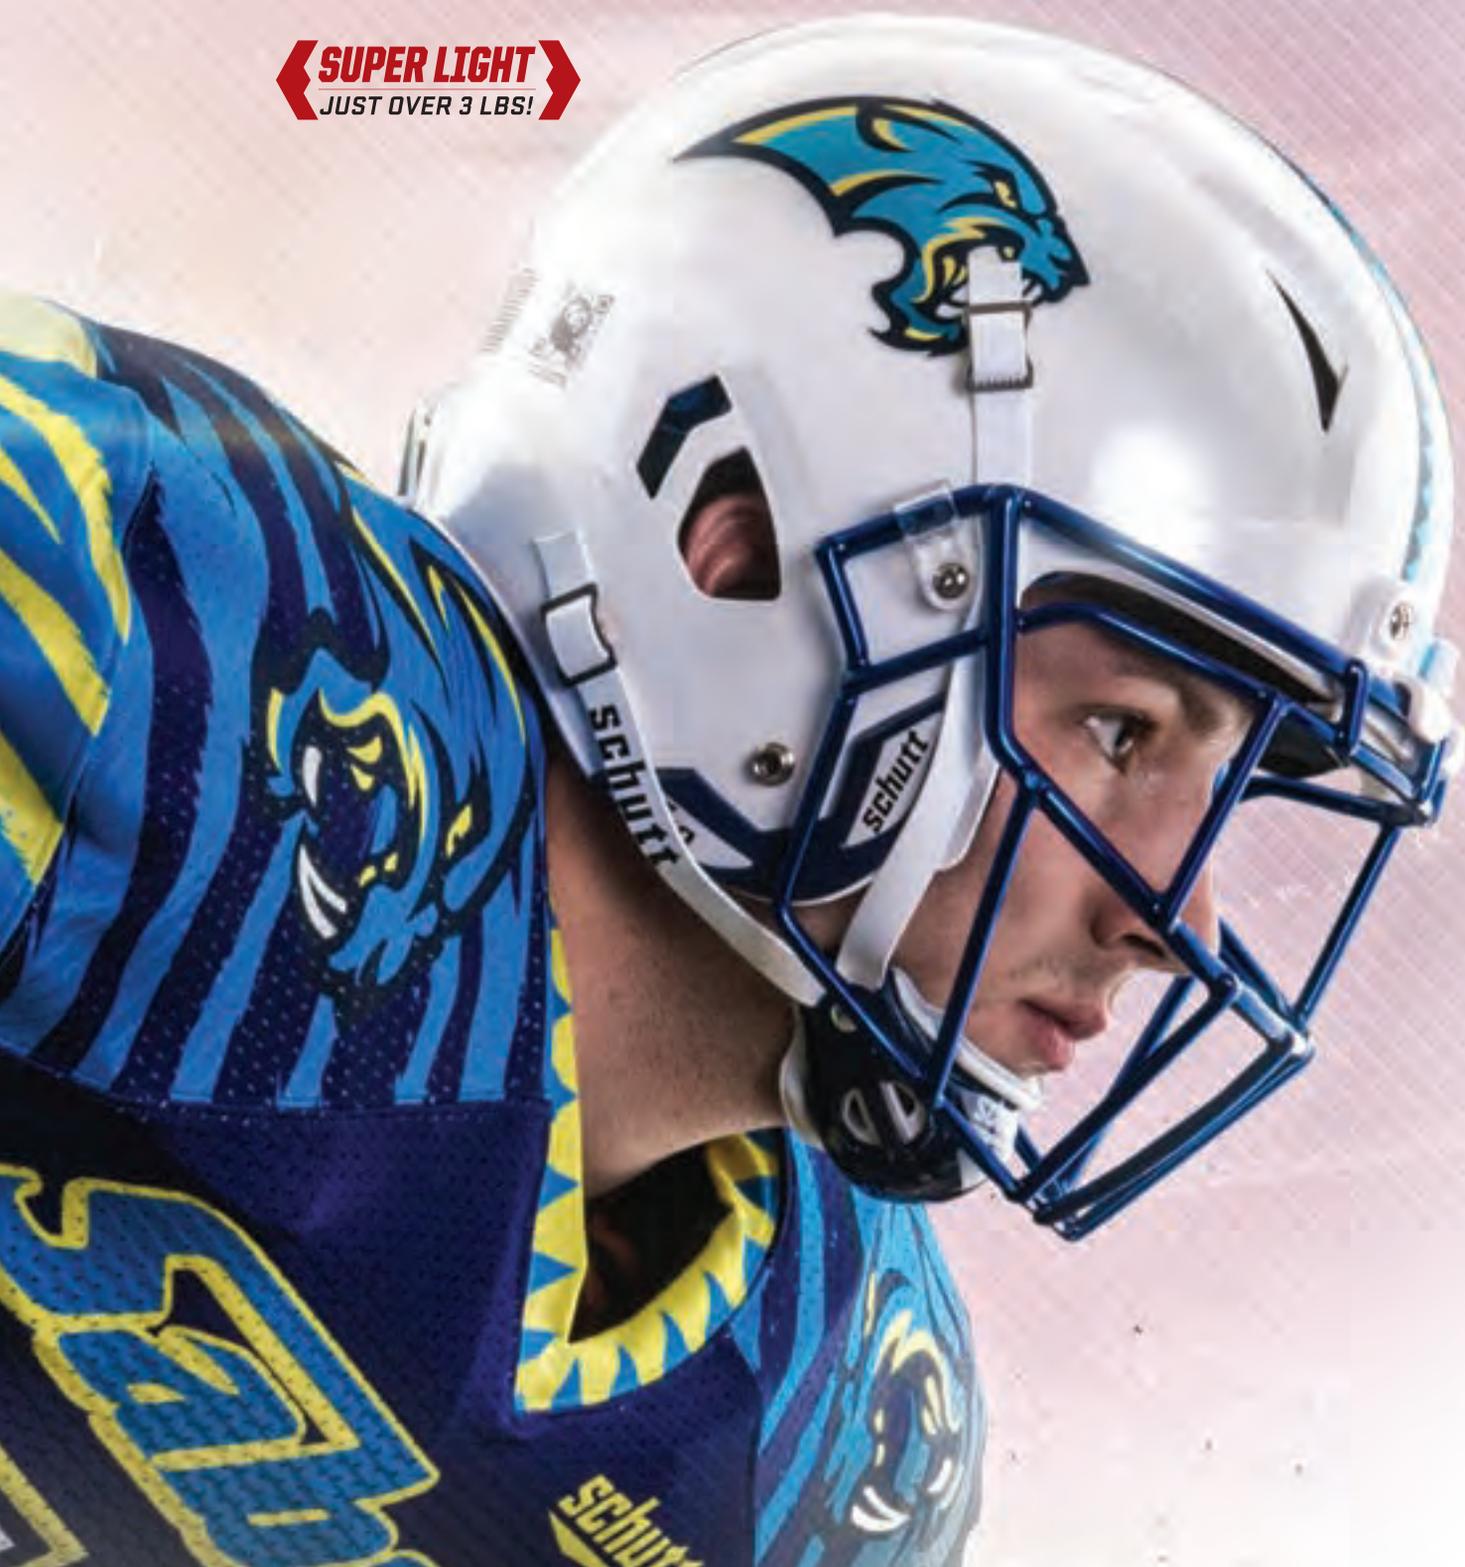

## *Vengeance Z10 for Players.*

The helmet that's best for any player is the helmet that fits him the best. Schutt helmets are legendary for their comfort and fit, thanks to features like the SUREFIT air liner. The Helmet Stabilization System frames your face and gives you a secure, "locked in" feel inside the helmet. Air flow inside the helmet is enhanced with the open sided TPU Cushions.

WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or facemask. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET, USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit schuttsports.com. Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at schuttsports.com. Using jaw pads from suppliers other than Schutt Sports will void the warranty.

**NEW FOR 2017**

# VENGEANCE PRO

MSRP: \$240.00

Schutt Sports is driven by the relentless dedication to the player. We build gear for performance. We build gear for protection. We build gear for players. Maybe that's why we have more 5-Star Rated Helmets than anyone else. Or why over 50% of NFL Skill Position players wear Schutt helmets. Or why we've had the highest ranked helmet in NFL Helmet Testing since 2010.

The PRO is one of two new Vengeance helmets taking football by storm. Over 150 players in the NFL have switched to the Vengeance PRO or Z10 since they were introduced in January 2016. The PRO features a new, lower-profile helmet shell (with the same fiery Vengeance design), along with a newly re-engineered front pad and inflatable crown liner, and SC4 Hard Cup Chin Strap. Still in the mix are the TPU-enhanced SUREFIT air liner, Inter-Link Jaw Pads and Vengeance face guard lineup.

## ***Vengeance PRO for Performance.***

The bold, high-powered Vengeance helmet shell in a lower profile that's significantly lighter. The PRO is rated a 5-star (Best Available) in the Virginia Tech STAR helmet rating system. The SUREFIT air liner wraps itself around the player's head, evenly distributing the pressure and weight.

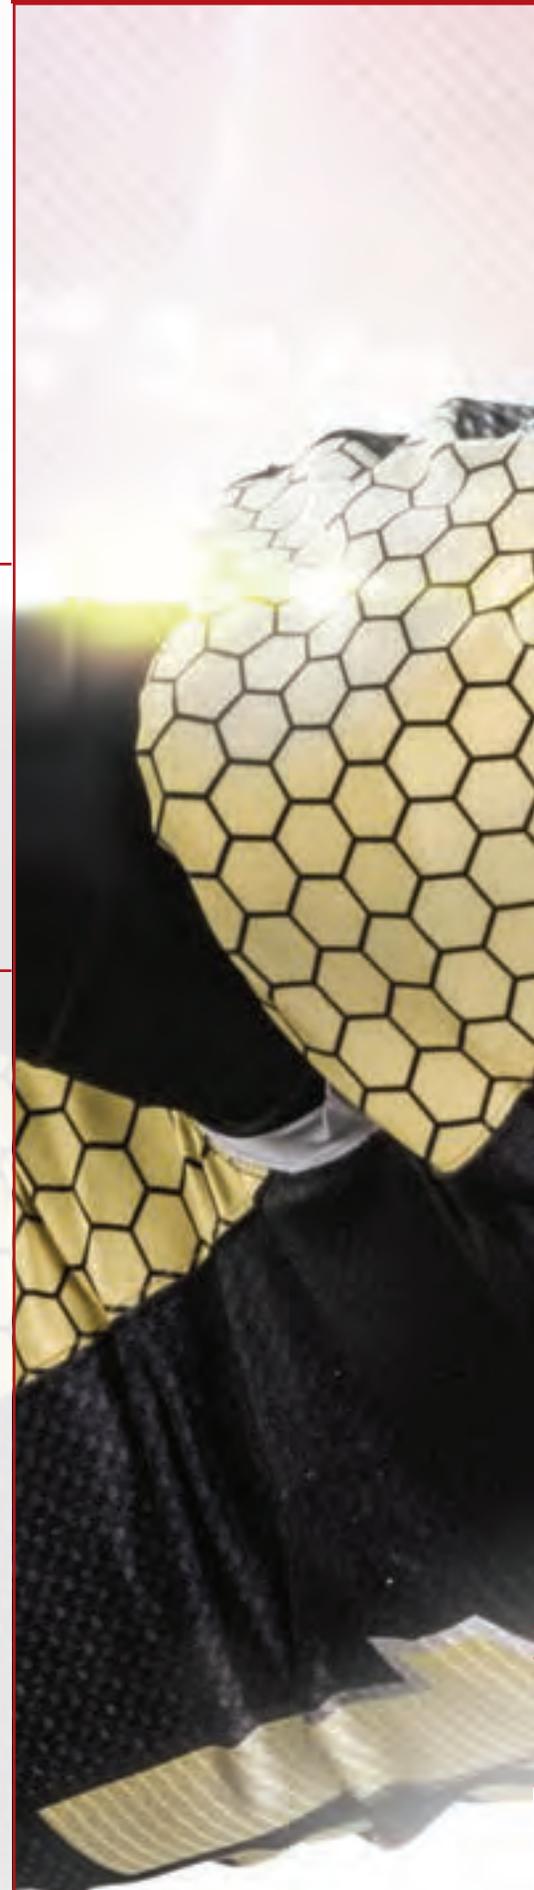

## ***Vengeance PRO for Protection.***

TPU Cushioning is featured inside the helmet, even in the Inter-Link jaw pads. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. TPU Cushioning won't take a compression set, even after thousands of impacts and it's virtually impervious to mold, mildew and fungus.

## ***Vengeance PRO for Players.***

The helmet that's best for any player is the helmet that fits him the best. Schutt helmets are legendary for their comfort and fit, thanks to features like the SUREFIT air liner. The liner wraps itself around the player's head, evenly distributing the pressure and weight. Air flow inside the helmet is enhanced with the open sided TPU Cushions.

Also available at [schuttsports.com](http://schuttsports.com). Using jaw pads from suppliers other than Schutt Sports will void the warranty.

# VENGEANCE VTD II

MSRP: \$300.00

Schutt Sports is driven by the relentless dedication to the player. We build gear for performance. We build gear for protection. We build gear for players. Maybe that's why we have more 5-Star Rated Helmets than anyone else. Or why over 50% of NFL Skill Position players wear Schutt helmets. Or why we've had the highest ranked helmet in NFL Helmet Testing since 2010.

The Vengeance VTD II takes performance and protection one step further than the original Vengeance. The large standoff helmet earned the 2nd best score of all 5-star helmets (Best Available) in the Virginia Tech STAR Rating System and features VTD TPU Cushioning for maximum performance. Complete with a TPU-enhanced SUREFIT air liner and a faceguard line designed specifically for the Vengeance helmet lineup, the VTD II is the best testing Vengeance helmet. New for this year are Inter-Link Jaw Pads and an SC4 Hard Cup Chin Strap

## *Vengeance VTD II for Performance.*

The bold, high-powered Vengeance helmet shell features Mohawk and Back Shelf design elements that make it stronger and more resilient. The large-standoff shell maximizes available space for the TPU Cushioning, making it the 2nd best scoring 5-star helmet on the Virginia Tech STAR helmet rating system.

## *Vengeance VTD II for Protection.*

The VTD TPU Cushioning in this helmet is specially designed for the VTD II, making it one of the best testing helmets on the market. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. TPU Cushioning won't take a compression set, even after thousands of impacts and it's virtually impervious to mold, mildew and fungus.

## *Vengeance VTD II for Players.*

**NEW FOR 2017**

# AiR XP PRO Q10

MSRP: \$450.00

Schutt Sports is driven by the relentless dedication to the player. We build gear for performance. We build gear for protection. We build gear for players. Maybe that's why we have more 5-Star Rated Helmets than anyone else. Or why over 50% of NFL Skill Position players wear Schutt helmets. Or why we've had the highest ranked helmet in NFL Helmet Testing since 2010.

The Q10 is the newest helmet in the Schutt lineup. It's everything players love from the Z10, but in the look and fit of the AiR XP Pro. The helmet features a new helmet shell that's lightweight, along with our all-new Helmet Stabilization System. It also features a newly re-engineered front pad and inflatable crown liner, and SC4 Hard Cup Chin Strap and a TPU-enhanced SUREFIT air liner.

## ***AiR XP Pro Q10 for Performance.***

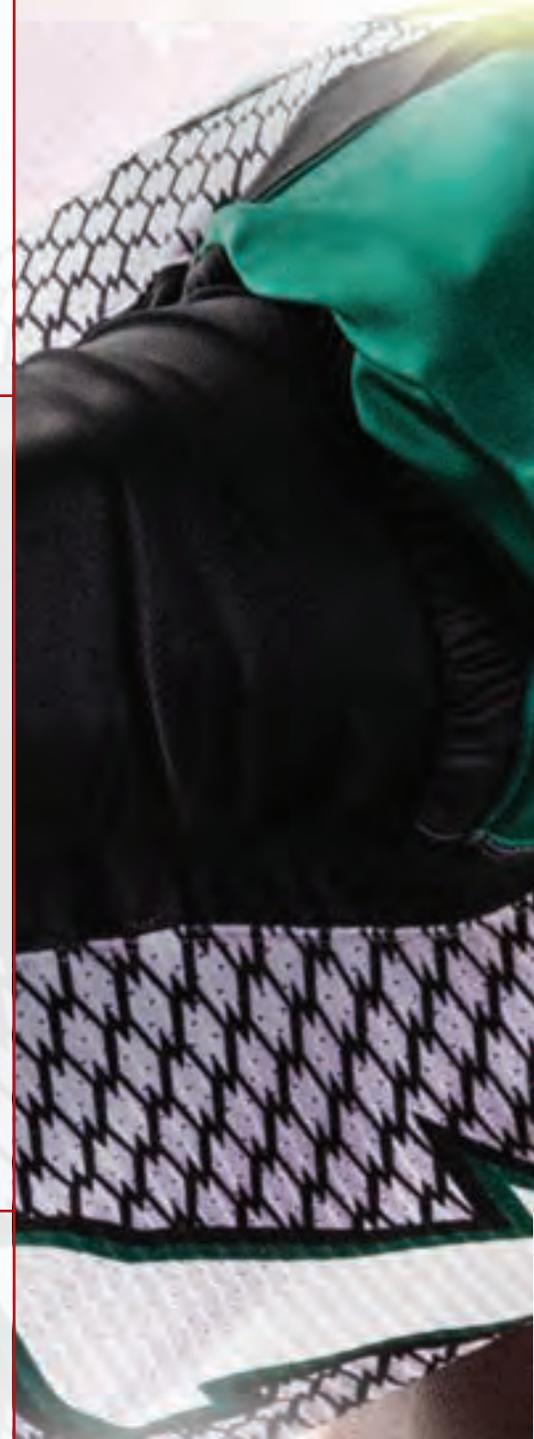

The graceful, fast curves of this classic helmet radiate speed and light weight. This helmet shell has traditionally been our most popular in the NFL, where over 50% of the skill players wear Schutt.

## ***AiR XP Pro Q10 for Protection.***

TPU Cushioning is used throughout the helmet. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. The Q10 features the all-new Helmet Stabilization System, which enhances performance through better fit.

## ***AiR XP Pro Q10 for Players.***

The helmet that's best for any player is the helmet that fits him the best. Schutt helmets are legendary for their comfort and fit, thanks to features like the SUREFIT air liner. The Helmet Stabilization System frames your face and gives you a secure, "locked in" feel inside the helmet. Air flow inside the helmet is enhanced with the open sided TPU Cushions.

Also available at [schuttsports.com](http://schuttsports.com). Using jaw pads from suppliers other than Schutt Sports will void the warranty.

# AiR XP PRO VTD II

MSRP: \$259.00

Schutt Sports is driven by the relentless dedication to the player. We build gear for performance. We build gear for protection. We build gear for players. Maybe that's why we have more 5-Star Rated Helmets than anyone else. Or why over 50% of NFL Skill Position players wear Schutt helmets. Or why we've had the highest ranked helmet in NFL Helmet Testing since 2010.

The AiR XP Pro VTD II takes performance and protection to another level. The helmet earned the best score ever recorded as a 5-star helmet (Best Available) in the Virginia Tech STAR Rating System, and is the number 1 rated helmet on the 2016 NFL Helmet Testing Protocol. The traditional standoff helmet with an expanded shell, features VTD TPU Cushioning for maximum performance. Complete with a TPU-enhanced SUREFIT air liner and an SC4 Hard Cup Chin Strap, the AiR XP Pro VTD II is the best testing helmet on the market.

## *AiR XP Pro VTD II for Performance.*

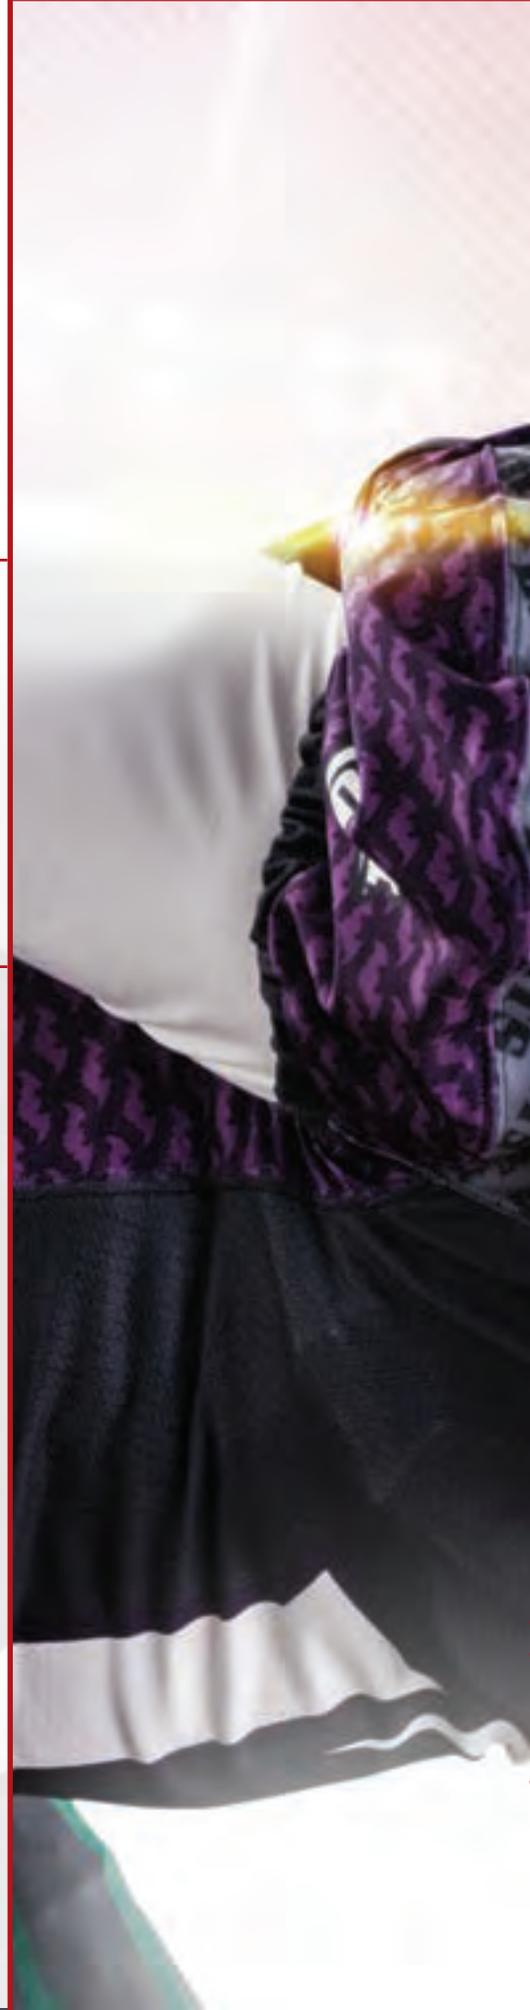

The graceful, fast curves of this classic helmet are quick and light weight. The expanded helmet shell maximizes available space for the TPU Cushioning, making it the best testing 5-star helmet on the Virginia Tech STAR helmet rating system and 2016 NFL Testing Protocol. The XP helmet shell has traditionally been our most popular in the NFL, where over 50% of the skill players wear Schutt.

## *AiR XP Pro VTD II for Protection.*

TPU Cushioning is used throughout the helmet, even in the Inter-Link jaw pads. The VTD TPU Cushioning in this helmet is specially designed for the VTD II. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. TPU Cushioning won't take a compression set, even after thousands of impacts and it's virtually impervious to mold, mildew and fungus.

## *AiR XP Pro VTD II for Players.*

The helmet that's best for any player is the helmet that fits him the best. Schutt helmets are legendary for their comfort and fit, thanks to features like the SUREFIT air liner. The liner wraps itself around the player's head, evenly distributing the pressure and weight. Air flow inside the helmet is enhanced with the open sided TPU Cushions. The AiR XP Pro VTD II is also equipped with Inter-Link Jaw Pads and an SC4 Hard Cup Chin Strap.

WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET, USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit [schuttsports.com](http://schuttsports.com). Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at [schuttsports.com](http://schuttsports.com). Using jaw pads from suppliers other than Schutt Sports will void the warranty.

## YOUTH VENGENCE Z10

MSRP: \$400.00

**NEW FOR 2017**

**« SUPER LIGHT »**  
JUST UNDER 3 LBS!

**1**

### HELMET STABILIZATION SYSTEM

Enhances performance through improved fit. The extended stabilizer jaw pads and stabilizers frame your face to give you a secure, "locked in" feel inside your helmet. Stabilizer jaw pads are comfortable, breathable and washable.

**2**

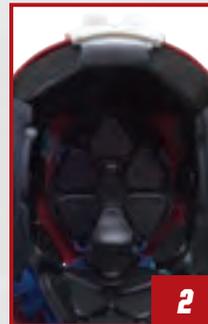

### TPU CUSHIONING

The most advanced impact-absorption system on the football field. TPU Cushioning in helmets has been proven to absorb more impact across a wider variety of temperatures than any other helmet. It gives you better heat management and won't take a compression set.

**3**

### ULTRA COMFORTABLE FIT

Inflatable crown liners, along with a SUREFIT air liner, SC4 Hard Cup Chin Strap and stabilizer jaw pads, the Z10 is one of the most comfortable youth helmets on the field.

Using jaw pads from suppliers other than Schutt Sports will void the warranty.

## NON-INFLATABLE HELMETS: FOLLOW RED STEPS ONLY

## INFLATABLE HELMETS: FOLLOW RED AND BLUE STEPS

**STEP 1**

Measure the player's head as shown, 1" above the eyebrows around the widest part of the head, using the chart on helmet pages for size guideline.

**STEP 2a**

Lubricate the pump needle generously and insert needle as shown. Do not force the needle into the port; doing so may puncture the liner's opposite wall.

**STEP 2b**

Begin with bottom inflation port on back of helmet. Perform 1-3 pumps. Helmet should be snug against player's head but not overly tight. Excess air is released with valve.

**STEP 2c**

When finished, repeat for top inflation port. Proper inflation will usually require 0-2 pumps, but that will vary.

**STEP 3**

Helmet's front edge and nose bumper should be approximately 1" above the player's eyebrows.

**STEP 4**

Attach chin strap to the helmet underneath the faceguard, never above it. Tighten chin strap to be snug and centered on the chin.

**STEP 5**

Jaw pads should be snug against the player's face, flush with his jaw, without pushing too forcefully into his cheeks.

**STEP 6**

The helmet should fit snugly, without being too tight. There should be no independent movement of the helmet.

For best results, we recommend using a Schutt Helmet Pump. Get yours on page 55!

DO NOT USE PETROLEUM BASED PRODUCTS, SUCH AS PETROLEUM JELLY. DO NOT WET THE NEEDLE WITH YOUR MOUTH. For complete helmet fitting instructions, see the fitting guide that accompanies each Schutt football helmet.

Works best on LIGHT COLORS

Works best on DARK COLORS

Some aquatech patterns work better on lighter paint colors, while others look their best on darker colors. Look for these symbols on the above swatches to pick the best pattern for your custom order!

**CHROME**

**METAL FLAKE**

The above chrome colors are standard, but why stop there? We have a lot more colors to choose from. You can even mix and match your finishes with different color combinations using our custom paint styles, found on page 44. Just another way Schutt does custom like no one else.

# CUSTOM PAINT STYLES

Why limit yourself to just one color? Because Schutt does all of our custom painting in-house, we can mix and match any color in our library with Custom Paint Style options.

With Schutt Custom Paint Style options, getting a unique look for your team is as easy as A-B-C.

**A** *BASE COLOR*   **B** *ACCENT 1*   **C** *ACCENT 2*

Choose from one of eight custom paint styles in our library. When paired with a set of custom decals, these paint styles are a great way to get a custom look for your team without breaking the bank.

FEATHERED WRAP

HALF & HALF

[A] represents a molded color.

WIDE STRIPE

HORN

HIGH PROFILE WING

LOW PROFILE WING

LOW PROFILE WEDGE

[C] represents a decal accent.

WEDGE

## Customized Designs

After consulting with you, the initial design idea starts as a sketch. Basic concepts are roughed out and the design story begins. Our designers are ready to help you establish a completely new look for your team from start to finish.

## Artwork Development

As the process moves forward, the work moves to the computer. The color palette begins to take shape. Our design team will produce different options for your team's logo/decals. An integrated style and color palette are used throughout each logo design.

## Decal Production

Once you've decided which logo/decals you like most, we'll work with you to figure out the best way to produce the decals, as well as recommend paint styles to fully integrate your brand. Uniform Numbers, Award Decals, Accents, Mascots; You name it, we can make it.

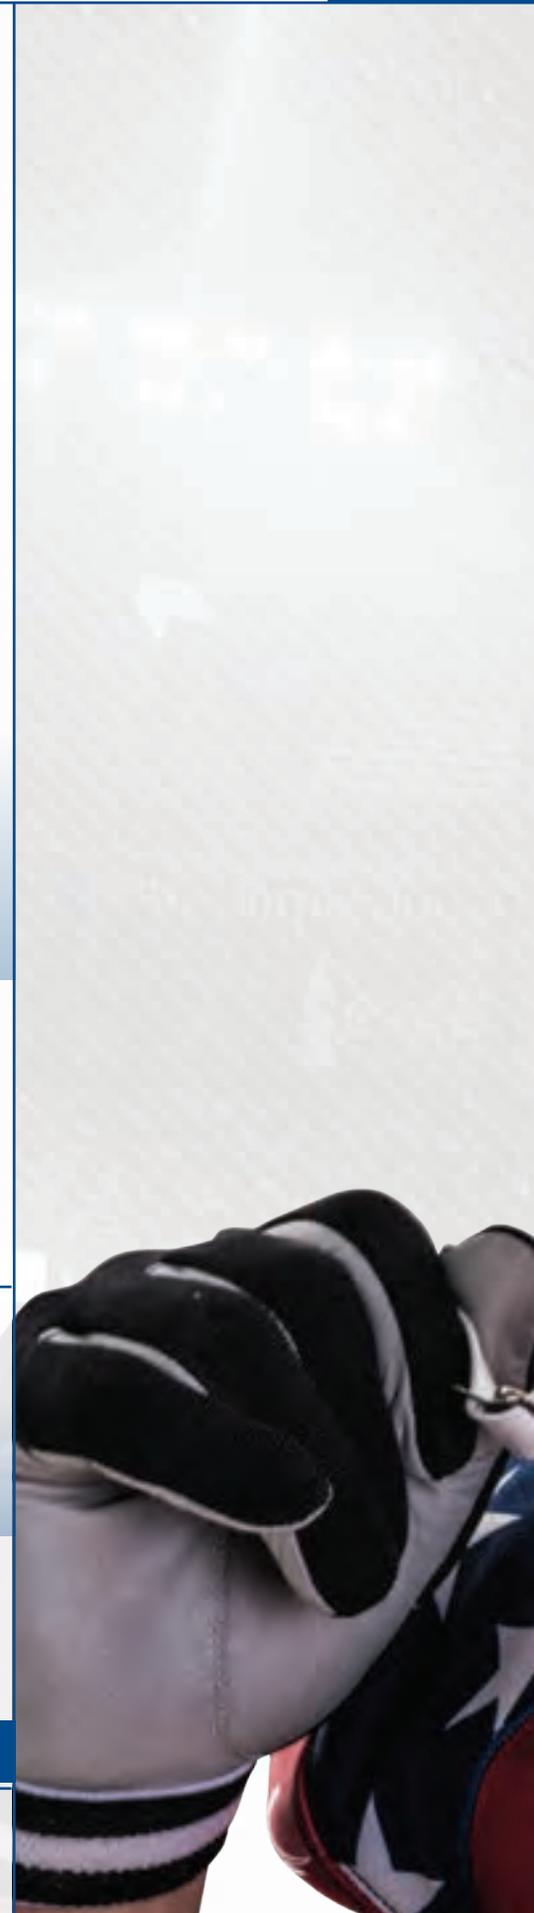

Mascot Decals

Accent Stripes

Bumper Branding

Custom decals are awesome. And surprisingly affordable. But there are a lot of details to work out. Our reps and design team will walk you through the process. From start to finish.

## FACEGUARD FITTING GUIDE

XL sized AiR XP Q10 helmets require the use of a Z10 Faceguard, found on page 58.

## ***Relentless Dedication to the Shoulder Pad.***

Helmets may be the star of the show on the field, but shoulder pads are a vital piece of a player's performance. Built for both dishing out a hit and absorbing one, the shoulder pads are a deep-rooted component of a player's on-field performance. And those shoulder pads better be up to the task. Like ours.

## AIR MANAGEMENT SYSTEM

The protective shoulder pad cushion is made of open cell foam with microscopic air chambers. The outside fabric is sealed to the foam trapping the air inside the cushion. When impact occurs on the shoulder pad arch the load is spread. The impact causes the arch to engage the cushion, which forces the air within the cushion to move throughout the foam chambers dissipating the pressure. The impact energy is dispersed over a larger area reducing the amount of force impacting the body.

## TPU CUSHIONING

Air Maxx TPU Cushioning that is used in our best performing helmets is featured in our Air Maxx Flex 2.0 Shoulder Pad Series. TPU Cushioning is positioned over the shoulders providing enhanced impact absorption. Air Maxx TPU is durable and will not break down – even after thousands of impacts.

## ENERGY LOCK TECHNOLOGY POWERED BY D30®

Energy Lock Technology powered by D30® is a lightweight, soft, and flexible material featuring unique molecular properties. In standard conditions its molecules flow freely, but on impact, they lock together to absorb impact energy and reduce the force transmitted. The material is rate sensitive, so the harder the impact, the greater the resistance to the force. Our D30® technology is strategically positioned over the shoulder for optimal impact absorption.

## CLAVICLE CHANNEL SYSTEM

System absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be re-positioned or removed to ensure a precise fit and complete coverage in the key hitting areas.

## TACTICAL ARCH DESIGN

High performance arch designs minimize weight without sacrificing hitting zone protection. Keeps cushions in proper hitting position with less "upward" movement of shoulder pads.

Epaulets and caps (low profile) eliminate "grab" points and create better overall performance.

Position specific arches include QB/WR, Skill for RB/DB, All Purpose for FB/LB/TE and OL/DL with Non-Epaulet design.

Raised corrugations for additional strength and increased air flow.

## OTHER FEATURES

Flat Pad Design is low profile for improved mobility. BIOTHANE™ belts create a snug and secure fit while securing the shape of the arch to maximize range of motion.

Pre-drilled for accessory attachment.

Removable deltoid and scapular pads for a custom fit.

Stainless steel hardware.

Removable body for easy hand washing of cushions.

# AIR MAXX FLEX 2.0

## AIR MAXX FLEX 2.0 QB|WR

Quarterback, Wide Receiver  
MSRP: \$310.00

The Air Maxx Flex 2.0 QB|WR pad offers an attached back plate and smaller arch cut that protects while still allowing for maximum flexibility and range of motion. The Air Maxx Flex 2.0 also features a hinged front connection.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

### AIR MAXX FLEX 2.0 CUSTOM

Customizing your team's uniform doesn't have to stop with the helmet. The Air Maxx Flex has a wide range of colors to choose from to create a shoulder pad that is unique to your team.

### AIR MAXX CUSTOM ACCESSORIES

You can complete your customized look, with a color-matched plate or rib protector.

Scarlet [03] | Black [06]

Maroon [12] | Black [06]

Navy [08] | Vegas Gold [28]

### HIGH PERFORMANCE PROTECTION

The O2 Maxx Shoulder Pad features upgraded padding protection for that heavy-hitting player who needs additional protection to both deliver and receive the hits.

### TPU CUSHIONING

Air Maxx TPU Cushioning that is used in our best performing helmets is featured in our new O2 Maxx Shoulder Pad Series. TPU Cushioning is positioned over the shoulders providing enhanced impact absorption. Air Maxx TPU is durable and will not break down – even after thousands of impacts.

### REDUNDANT PADDING

Energy Lock Technology is a lightweight, soft and flexible material featuring a molecular structure that locks together upon impact dispersing the impact and reducing the force applied to the pad. The material is rate-sensitive, so the harder the impact, the greater the resistance to the force. The material is strategically positioned for optimal impact absorption.

### CLAVICLE CHANNEL SYSTEM

This system absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be re-positioned or removed to ensure a precise fit and coverage in the key hitting areas.

### TACTICAL ARCH DESIGN

High performance arch designs minimize weight without sacrificing hit zone protection. These new arches are engineered for maximum range of motion and mobility.

Streamlined and balanced arch designs keep arches and cushions in proper hitting position with less “upward” movement of shoulder pads.

Newly designed, positioned and sized epaulets and caps (low profile) eliminate “grab” points and create better overall performance.

Raised corrugations for additional strength and increased air flow.

### OTHER FEATURES

Ventilated arches with raised corrugation and 7 mm vent holes combine with perforated high impact EVA foam throughout the body cushion also encourage heat and sweat movement.

BIOETHANE™ belts create a snug and secure fit while securing the shape of the arch to maximize range of motion.

**O2 MAXX QB/WR**

Quarterback, Wide Receiver

MSRP: \$250.00

The O2 Pro QB|WR pad offers an attached back plate and smaller arch cut to reduce the plastic that gets in your way. The arch cut allows maximum range of motion and versatility.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

The XV HD has many of the same features as our pro-level shoulder pads and features high-density EVA foam for greater impact absorption and durability. The moisture and heat management system of the XV HD allows airflow to and from the body which allows the skin to dry and the body to continue its natural cooling action.

**TACTICAL ARCH DESIGN**

High-performance arch designs to minimize weight without sacrificing hitting zone protection. These new arches are engineered for maximum range of motion and mobility.

Streamlined and balanced arch designs to keep arches and cushions in proper hitting position with less “upward” movement of shoulder pads.

Designed, positioned and sized epaulets and caps (low profile) eliminating “grab” points and creating better overall performance.

Position specific arches include QB/WR, Skill for RB/DB, All Purpose for FB/LB/TE and OL/DL with Non-Epaulet design.

Raised corrugations for additional strength and air flow.

**HEAT AND MOISTURE MANAGEMENT**

High-density EVA foam is perforated throughout the body cushion allowing heat to escape.

The ventilated arch has raised corrugations and 7mm vent holes to allow heat to escape and excess sweat to evaporate. Multi-Axis air flow channels maximize breathability.

**CLAVICLE CHANNEL SYSTEM**

This system absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be repositioned or removed to ensure a precise fit and coverage in the key hitting areas.

**OTHER FEATURES**

Flat Pad Design is low profile for improved mobility.

BIOTHANE™ belts create a snug and secure fit while maintaining the shape of the arch to maximize range of motion.

Pre-drilled for Accessory attachment.

Removable deltoid and scapular pads.

Removable body cushion for easy cleaning.

The lightest varsity shoulder pad we can build while maintaining pro-level standards.

# XV HD

## XV HD QB|WR

Quarterback, Wide Receiver  
MSRP: \$190.00

The XV HD QB|WR pad offers an attached back plate and smaller arch cut to reduce the plastic that gets in your way. The arch cut gives you maximum range of motion and versatility.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

Suitable for all positions  
MSRP: \$120.00

The T-Flex Youth All Purpose Shoulder Pad features upgraded padding protection for that heavy-hitting youth player who needs additional protection to both deliver and receive the hits. The All Purpose arch is suitable for every player on the field.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

**HEAVY HITTING PERFORMANCE**

High Impact EVA foam provides added protection over most youth pads. Dual-density EVA foam is the extra performance that you may need for those larger-than-life plays. Stainless Steel hardware is yet another varsity-level performance feature that sets this pad apart.

**HEAT AND MOISTURE MANAGEMENT**

Perforated body cushion combined with breathable mesh and 7mm arch vent holes makes this pad supremely breathable. Maximum air flow keeps you cooler and allows you to perform better.

**THREE-POINT BELT SYSTEM**

Varsity-level BIOTHANE™ belts bolster a three-point attachment system that provides better fit. The two points of attachment at the back arch provide a more snug fit pulling the arch to the body.

**ANTIMICROBIAL TREATMENT**

The body cushion materials are treated with an antimicrobial solution that prevents the growth and spread of mold and bacteria.

# MID FLEX 4.0

Suitable for all positions  
MSRP: \$95.00

Superior Performance. The New Mid Flex 4.0 Shoulder Pad features raised corrugations and 7mm vent holes. Arches are positioned over the shoulders for maximum protection. Suitable for every player on the field.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

## X-Small

Weight: 165-175

## 2X-Large

80235707N0506  
Shoulders: 18 - 19"  
Weight: 175+

## HEAT AND MOISTURE MANAGEMENT

Perforated dual-density padding combined with breathable mesh and 7mm vent holes in the arches makes the Mid Flex 4.0 body cushion breathable and allows maximum air flow keeping you cooler than most youth pads.

## THREE POINT BELT SYSTEM

The adjustable elastic belt features attachment to the arches at three points. The two points of attachment at the back arch provide a more snug fit pulling the arch to the body. This better fit means less movement and more consistent protection.

## ANTIMICROBIAL TREATMENT

The body cushion materials are treated with an antimicrobial solution that prevents the growth and spread of mold and bacteria.

## ALL PURPOSE PERFORMANCE

The Mid Flex 4.0 arch design is meant for use all over the field. The arches are meant to give protection while allowing freedom of movement. The raised corrugation provides added strength to the arch in key hitting areas. The integrated clavicle channel blocks give an added layer of protection around the shoulder.

Quarterback, Wide Receiver  
MSRP: \$52.00 - \$66.00

A lightweight, all purpose design for the exceptional youth athlete looking for varsity style protection. The extended body length adds extra protection.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

**ALL PURPOSE PERFORMANCE**

The Y-Flex 4.0 design is meant for all positions. The arches give protection while allowing range of motion and extra length front cushions for added protection. The raised corrugation provides added strength to the arch in key hitting areas. The integrated clavicle channel blocks give an added layer of protection around the shoulder.

**HEAT AND MOISTURE MANAGEMENT**

Perforated dual-density padding combined with breathable mesh and 7mm vent holes in the arches makes the Y-Flex 4.0 body cushion breathable and allows maximum air flow keeping you cooler than most youth pads.

**THREE POINT BELT SYSTEM**

The adjustable elastic belt features attachment to the arches at three points. The two points of attachment at the back arch provide a more snug fit pulling the arch to the body. This better fit means less movement and more consistent protection.

**ANTIMICROBIAL TREATMENT**

The body cushion materials are treated with an antimicrobial solution that prevents the growth of mold and bacteria.

7 on 7, Flag Football  
MSRP: \$95.00

Whether it's 7-on-7 or flag football, the O-Seven Soft Shoulder Pad is a lightweight layer of protection against bumps and abrasions. A fully breathable body makes it perfect for the heat of the season as well as the moment.

Not suitable for full-contact football.

## HEAT MANAGEMENT

Perforated dual-density body cushions combine the new 3D molded high density EVA foam with a base layer of perforated EVA foam providing unparalleled breathability. This allows air flow to and from the body encouraging the skin to dry and the body to continue its natural cooling action.

## LIGHTWEIGHT PROTECTION

While not for use in tackle football, the lightweight yet protective cushioning in the O-Seven is perfect for "non-contact" sports. Minimal weight and interference from a tactical body cushion with removable, low-profile shoulder caps.

## ANTIMICROBIAL TREATMENT

The body cushion materials are treated with an antimicrobial solution that prevents the growth and spread of mold and bacteria.

These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

The shoulder pad lineup from Schutt combines tactical performance advantages with new arch designs to create a compelling series of shoulder pads unlike anything in the marketplace. We've taken cutting edge technology, like TPU Cushioning and D30®, from our football helmets and put them into the top end of our shoulder pad line. We are constantly improving our youth and entry level shoulder pads, packing in more bang for your buck.

- Offers comfort and cushioning to neck area.

- Made from a nylon material that is easy to clean.

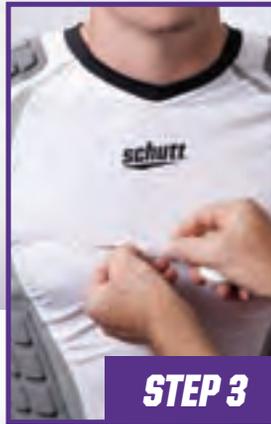

<b>79950000</b>	Varsity OSFM
<b>79850000</b>	Youth OSFM

Identify player position, and select the corresponding Schutt Shoulder Pads. Refer to the product guide on page 87.

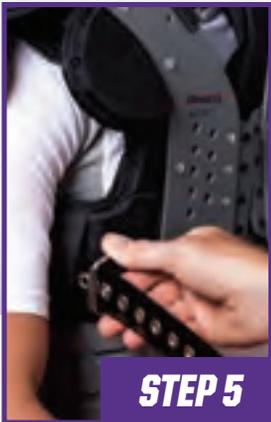

Measure shoulder span from right to left tips of the humerus.

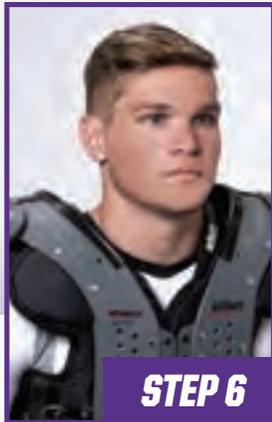

Wrap measuring tape around player's torso to measure chest circumference

Carefully lower the pads over the player's head.

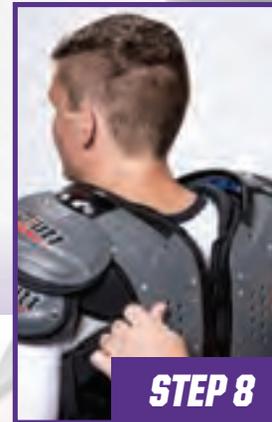

Buckle belts, and connect any straps that your shoulder pad uses. Ensure a good tight fit in chest and back areas.

Ensure proper front coverage by confirming that shoulder pads cover the sternum, as well as front upper shoulders.

Check to ensure that there is no pinching in collar area.

In the back, pads should cover the scapula and rhomboid areas. Fitted properly, shoulder pads should allow player maximum motion.

## ***Performance and Protection Start at the Skin.***

The daily ritual of strapping on the gear and putting on your uniform is a familiar routine for the football player. Today's player knows more than ever that a first layer of protection is an all-important first step to getting maximum performance that day.

## PRO CUT JERSEY

MSRP: \$18.00

12829201 Flex Net BM

## DEAD-ON TARGET TRAINING

Complete Set | MSRP: \$275.00

NEW FOR 2017

The Dead-On Target Training System is not only training the body but the mind as well. The patented design of Dead-On Sports Precision Targets gives a visual imprint unlike any other sports equipment. It goes beyond your regular training aspects by using mind mapping to increase accuracy and consistency. Most would agree that accuracy is built by increasing concentration and focus, and the small Dead-On targets encourage these.

DO 18 TARGET

### ACCURACY BUILDING TARGETS

It could mean the difference between a narrow victory or heartbreaking defeat. DeadOn Sports Target Training System increases accuracy and consistency by giving you a precise point of impact while blocking out visual noise for maximum concentration.

### VERSATILE DESIGNS

The versatility of the design makes it ideal for long snappers and QBs, setters as well as hitters. The frame can be outfitted with a Strike Zone for softball/baseball pitching and field practice.

### DURABLE CONSTRUCTION

The body cushion materials are treated with an antimicrobial solution that prevents the growth of mold and bacteria.

- 12829308 Football Complete Set
- 12829305 DO-18 Target
- 12829304 DO-15 Target
