ECCO BIOM HYBRID 3

LET NATURE AND TECHNOLOGY SWING

Whether you are hitting an approach to the green, or going for a stroll after your round, you are sure to benefit from this shoe's innovative outsole, called ECCO Tri-Fi-Grip®. With three different zones - one for stability, one for durability and another for rotation - the outsole assists you from back-swing to follow-through. Other technologies include BIOM® NATURAL MOTION®, which encourages a more natural walking motion for added power and efficiency, as well as enhancing feeling and stability. Uppers crafted from yak leather, help to make this an extremely breathable and durable shoe, while the GORE-TEX® ensures it is 100% waterproof.

ECCO BIOM HYBRID 3

LET NATURE AND TECHNOLOGY SWING

By putting a fresh spin on the bestselling ECCO BIOM HYBRID 2, we have created a new shoe that will illuminate any golf course (or wherever else you choose to walk in it). On and off the fairways, you will appreciate the innovative ECCO Tri-Fi-Grip®. With three different zones - one for stability, another for durability and the third for rotation – the outsole assists you through your swing, while it is comfortable and flexible when walking. The BIOM® NATURAL MOTION® technology adds power and efficiency to your stride, while also enhancing feeling and stability. Uppers crafted from yak leather offer superior breathability and durability, with the GORE-TEX® construction making the shoe 100 per cent waterproof.

STEPPING OUT OF THE ORDINARY

The dynamic design and construction, inspired by running footwear, duplicates their ability to be lightweight, agile and perform to the highest standards.

Dual material upper features a soft, breathable mesh upper bonded with microfiber for optimal support and stability. The upper is treated with HYDROMAX® for superb weather and perspiration resistance.

Direct-injected TPU outsole featuring E-DTS® technology for excellent grip, traction, durability & flexibility.

A removable Ortholite® inlay sole offers the option for extra width while giving you long-term cushioning and enhanced breathability.

An asymmetrical closure system enables a revolutionary, close-to-the-foot fit, resulting in excellent support and stability.

A direct-injected PU wrap up is an extension of the midsole, adding additional support as you transition your weight when finishing your swing.

ECCO S-DRIVE represents an entirely new take on golf footwear. Drawing inspiration from the running market, the bold, athletic styling is matched with a simple, yet highly-technical asymmetrical last to enhance both fit and feel. The result is a lightweight, agile design that still offers the comfort, stability and performance golfers demand.

FEEL AS FRESH ON THE 18TH GREEN...

You don't have to be a professional golfer to benefit from ECCO's professional craftsmanship. From the Cage Pro to the Casual, our shoes are created with the goal of making your game even more enjoyable. The soles reduce contact pressure with scientific accuracy and aim to eliminate stress where you're most likely to feel it. The inner linings wick away moisture from the inside, while treated leather blocks moisture from the outside.

With a peerless focus on quality, ECCO oversees every aspect of the manufacturing process, including design, leatherwork, sole production, and final assembly.

BIOM® NATURAL MOTION®

Imagine a sole that offers unrivaled comfort, no matter who wears it. With knowledge gained from over 2,500 individual foot-scans, ECCO BIOM® NATURAL MOTION® does exactly that. By shifting your landing from the heel to the mid-foot, it allows your foot muscles to move more naturally, eliminating any discomfort and reducing your chance of injury, while allowing for more effective use of your foot's muscles. The result is a shoe that feels great at tee-off, and just as good several hours later.

HYDROMAX®

ECCO HYDROMAX®

A single touch lets you know that ECCO HYDROMAX® leather is a cut above the rest, and that's before you get it wet. The specially treated uppers provide outstanding protection against the elements. The tanned hide is infused with a water-repellant compound designed to hold out against repeated exposure to the toughest weather. Constructed specifically to keep water out and your feet dry from your first swing, to your last putt.

ECCO DYNAMIC TRACTION SYSTEM®

A patented outsole design first introduced on the famed ECCO GOLF STREET model, the ECCO DYNAMIC TRACTION SYSTEM® consists of approximately 100 molded traction bars. Constructed from TPU – a highly durable, wear-resistant material – these elements boast 800-plus traction angles to provide excellent grip in all conditions.

...AS ON THE 1ST TEE

Different shoes incorporate different technologies, but all of them realize the ECCO mission of balancing your need for performance with your desire for pleasure, because the truth of golf is as simple as this: when you feel great, you play great, every time.

GORE-TEX®

ECCO leather does a great job of keeping water out, and GORE-TEX® membranes complement the process by neutralizing moisture from within. With 1.4 billion pores per square centimeter, this ingenious membrane mimics human skin, allowing moisture to leave through the breathable interior, but preventing it from re-entering your shoe.

ECCO SPYDR-GRIP®

The ECCO SPYDR-GRIP®'s naturally placed pivot points provide a strong foundation from backswing to follow-through – for support where you need it and long-lasting comfort even after hours of play. With an organic-structure outsole design, dirt clogging in the sole is reduced and the shoe is gentle on greens. The direct injection polyurethane construction makes the ECCO SPYDR-GRIP® incredibly light, yet highly durable and flexible for ultimate comfort.

BOA® CLOSURE SYSTEM

The innovative Boa® Closure System provides custom comfort with smooth, even closure. The Boa® Closure System can be adjusted quickly and precisely with only one hand. Made from aircraft-grade stainless steel, the durable Boa® laces can handle even the highest tension while being dirt-repellant and easy to clean.
