lacrosse

pro7

Pro7 with SEVEN Technology:

The most advanced helmet Cascade has produced!

The *SuperMono* design uses the shell as a stress member to manage the energy from a frontal impact and also shifts the weight load back to make a superior balanced helmet.

The new **Pro7** is the only helmet in lacrosse with the Seven Technology liner system. The system laterally displaces energy from a direct impact, reducing the effects of G forces, a major cause of concussions.

THE MOST
TECHNOLOGICALLY ADVANCED
HELMET CASCADE HAS EVER PRODUCED

Cascade CPV: Engineered for player with smaller frames

DNA: Cascade Heritage

Worn by more lacrosse players than any other-- The genetics of a Cascade is bred into every component of the CPV™

The Cascade legacy of style, science and safety is at it's core Over 20 years of American-made quality are built into the CPV

V-Series Visor, Shell and Chin

- Low-profile means fast and sleek
- Ultra-light, weighing in at 1.9 lbs
- The CPV visor and chin are tailored to accommodate a wide range of head sizes in serious style

**ENGINEERED
FOR THE PLAYER
WITH A SMALLER FRAME**

V SERIES

SPRfit™

official helmet of

CS

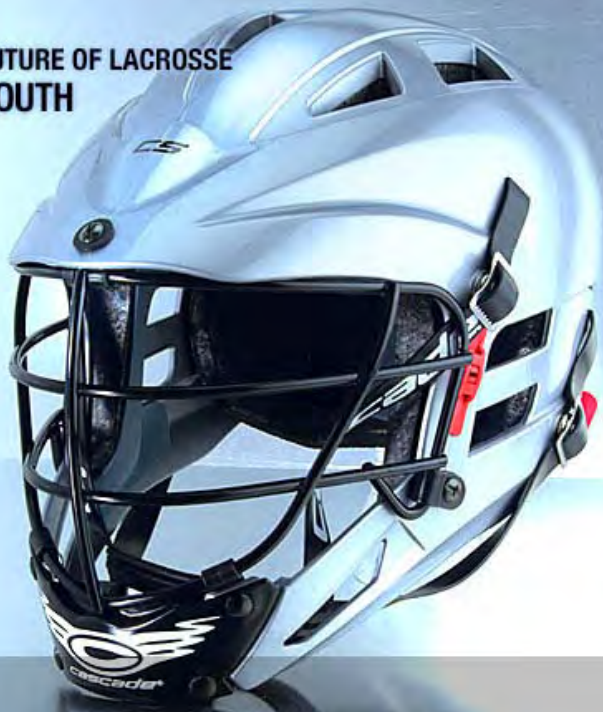

The CS™ has everything the young player needs to take the field for the first few seasons with the slick style of the pros.

This one grows with you and the fit adjustment will be the easiest 30 seconds of your life.

This isn't a scaled down version of our college and high school helmets. A kid's head is different so we went into the field for months and compiled information on kid's growth, head shape and wish list. You get the lightest, most comfortable helmet in the game at an affordable price.

We know you're the next generation

THE FUTURE OF LACROSSE CS YOUTH

official helmet of

PolyAir™

The Continuous-Quest-for-Vision-and-Comfort train just pulled into town. Here's the lowdown:

Cascade Heritage

We live to bring innovation to athletes so they can wow and inspire us

We push the envelope in our test lab so players can on the field

Outta Sight Bar Technology - VISION

The low profile aerospace grade stainless bar allows a crisp view of ground balls and up-field action
Safety is queen. Meets ASTM standard for women's lacrosse. (60 mph ball impact)

Vision. seeing is believing...and

Outta Sight Bar Technology
VISION

official helmet of

mini

Don't think for a second this is a little sister.

We started from scratch and studied the eye positioning, width between eyes and cheek structure of adult and youth girls with smaller faces.

The Mini is quickly becoming the most popular mask in the game because bigger isn't always better. We opened up your view of the field, got rid of all the excess bulk and priced the Mini as the best value out there.

**MINIMALIST
WITH AN ATTITUDE**

MEETS ASTM STANDARDS

eyemasks

heritage

official helmet of

ipro

We know you are set on showing the lacrosse world what you can do so we thought we would give you some ammo. The I-PRO.

The first thing you'll notice about the Iris™ Pro is the OpticArm™ that moves the hold point back 2 inches on each side to make the fit more stable than you ever thought possible.

The open cat eye wire is why elite level players in college and high school have been snatching these gems up since we launched. Grab one and you'll find a few ounces make all the difference.

Supremacy is yours girl

PolyPro™

Welcome to the next chapter in eyemask innovation: The PolyPro™

Lighter than Ever

Made of a sleek and durable copolymer (that's right, we said copolymer), the new PolyPro is so much lighter than your other options. At half the weight of a wire eyemask at 2 oz. you lose the excess bulk and gain a "barely there" comfort

You are under feeling. Seriously! Put it on!

Unmatched

You have enough pressure practicing hard and playing harder.

A sophisticated blend of vision, comfort and light weight

IRIS

IRIS
code: CI
msrp: \$64.95

Cascade Iris eyemask- visibly superior eye protection.

Our passion for performance has lead us here. Frustrated with the current offerings, Cascade went on a 3 year R&D mission to create something better- based on the real conditions of the game, and the excelling ability of the female athlete.

The Iris was introduced in the fall of 2002 and a new industry standard was established. No more fogging, scratching, distortion and built to withstand a 60mph shot. An entirely new product category was created, and Cascade is proud to be at the forefront.

IRIS TECH

3-D Liner System

Triple density foam absorb the hit, soften the blow and our replaceable, wicking fit foam sits soft against your face.

SiteLine vision system

Each bar has been engineered in just the right location to offer increased vision and incredible strength. We bent, curved, and arced every component to make this mask the ultimate in vision, strength and style.

Safety Standard

Designed to and meets the ASTM F 803-03 standard for women's lacrosse and field hockey for both youth and adult (high school and college) play
PECC Approved
