SHOES

6

Field Shoes Cleated traction for all surfaces. Cushioned mid-sole. Available in regular or patent leather. In (D) or (EE) widths.

Court Shoes Air-pac cushioning in the heel provides exceptional comfort on the court. Available in regular grain or patent leather. In (D) or (EE) widths.

The "Plateman" line Lightweight hardened toe protective shoes for behind the plate. Fully cushioned with multi-surface sole that provides great traction in all weather and field conditions. (D) widths available in low cut regular or patent leather and mid cut regular or patent leather. (EE) Width available in both regular leather shoes.

The "Square Toe" Kicking Shoe
The upturned "Square Toe" angle provides a solid flat impact area that's the perfect choice for the straight-on kicker. The rigid toe box and pre-formed sole gives the user consistent results each and every time. The upper is constructed from full grain leather. Shoe is solid black and available in left or right versions. Left and right shoes sold separately

The "+3" Kicking Shoe
The Pentagon Sports "+3" Placekicking and Punting shoe was designed with the assistance of Wizard Kicking of Orange, CA. The shoe is constructed of strong, lightweight full grain kangaroo leather and is built on a specialized last that conforms to your foot for a glove-like fit. That results in a shoe that feels like it's part of your foot. A unique combination of outsole materials make the shoe extremely soft and flexible. We've also reinforced the impact area to reduce wear and have moved the laces to the outside of the shoe for a smoother, more uniform impact area. Individuals are recommended to select a shoe 1/2 to 1 1/2 sizes smaller than a traditional leather shoe. Left and right shoes sold separately
