SPORTS BALLS | EQUIPMENT 2010

SOCCER LINE

The Reebok 100F series of match level balls are the ultimate in consistency and performance. Reebok's Advanced Concepts Group has engineered a match ball using our Thermo Heat Bonding technology that delivers one of the most consistent and dependable footballs in the market today. Because the panels are laminated and not stitched, each football is consistent from one ball to the next. The Reebok 100F series cover material is designed for maximum abrasion resistance without sacrificing feel. Because the football is not stitched, it has exceptional water-resistant properties. The Reebok 100F series is the next generation in football technology.
