Force of blows along medial length of tubes is slowed and dissipated by the friction of patented diametrically opposed inner ribs of the tubes.

Each tube dissipates shock to its adjacent tube.

Sealed rubber tubular panels trap air to cushion blows.

Patented.

Air Brace™ Patella Circular Centering brace of neoprene stabilizes knee cap and protects collateral ligaments.

Air Brace™ slim tri-panel design is less encumbering, yet offers more square-inch protection to the knee.

THE AIR BRACE™

Kneepad

For Maximum Protection and Stability. In the long standing tradition of Cliff Keen quality and innovation comes the Air Brace™ kneepad - the best knee protection for any sport. Several years in the making, the Air Brace™ was developed by orthopedic surgeons, engineers and coaches, and was tested by thousands of athletes and coaches. Its unique, sealed rubber tubes dissipate shock four ways, while a triple-pad design protects the entire knee. And because it's so lightweight, the Air Brace™ allows complete mobility.
